

Annual convention for Deans & HoDs of Partner Institutes - Civil Engineering, Udaipur - 23 & 24 August 2024

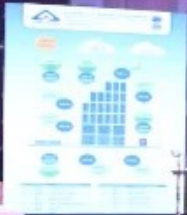

BIS organized a convention for Deans and Heads of Departments (HoDs) of the partner institutions in the Civil Engineering discipline. The event was held at Essentia Luxury Resort & Spa in Udaipur on the 23rd and 24th of August 2024. Shri Pramod Kumar Tiwari, IAS, and Director General of BIS, inaugurated the program, underscoring the vital role of academia in the standardization process. He highlighted the challenges faced by BIS, such as sporadic involvement of academia in standardization, the lack of synergy between ongoing research and its relevance to standardization, and the representation of an unbiased Indian viewpoint in international standardization. The convention brought together top academicians from the Civil Engineering discipline, providing a platform for knowledge exchange and collaboration.

The Deans and HoDs of the partner institutions participated with great zeal and enthusiasm, contributing to vibrant discussions and exchanging ideas for future collaboration. The Heads and officers of SCMD, CED, WRD and JPBO participated in the Technical Discourses and delivered Technical presentations on specific subjects organized during the course of the Convention.

The convention concluded on a high note with a field visit and sightseeing tour on the second day, further strengthening the bonds between BIS and the academic community. This convention marks a significant step forward in aligning academic research with the needs of national and international standardization, ensuring that India's standards remain at the forefront of global developments.

INDIAN STANDARDS AS GLOBAL BENCHMARKS

“It is important for Bharat to be recognized for its best quality. For the world, we now need to focus on the field of design and emphasize ‘Design in India.’ We must strive to make Indian Standards synonymous with International Standards. When Indian Standards become International Standards, it will make it easier for our products to receive global acceptance. This will depend on the quality of our production, the quality of our services, and the quality of our approach. Therefore, we must focus on quality as we move forward. We have the talent, we can offer many new things to the world in the field of design. We must embrace the call of ‘Design in India’ and move forward with the dream of ‘Design in India and Design for the World.’
