

BUREAU OF INDIAN STANDARDS

Program of Work

ETD 44 : Safety Of Machinery- Electrotechnical Aspects

Scope: Standardization in the field of the application of electro-technical equipment and systems to machinery (including a group of machines working together in a coordinated manner, excluding higher-level systems aspects) not portable by hand while working, but which may include mobile equipment. The equipment covered commences at the point of connection of the electrical supply to the machinery. Standardization of interfaces (excluding local area networks and field-bus) between control equipment and the electro-technical equipment of machinery. Standardization of electro-technical equipment and systems relating to the safeguarding of persons from hazards of the machinery, its associated equipment and the environment. To coordinate with ISO/IEC on all matters concerning the safety of machinery.”

Liaison: **IEC TC-44 (P):** *Safety of machinery - Electrotechnical aspects*
