## 5.5 Commenting on P-Drafts by Members of Technical Committee

5.5.1 P-Draft is the stage where members of the concerned technical committee can support or reject the project or offer comments for improvement. Therefore, abstaining from commenting on the P-Draft by a member has serious implications on the quality of the draft. BIS had issued directions regarding commenting on P-Drafts wherein any member not commenting on two consecutive and/or one-fourth of the P-Drafts circulated by the Technical Committee in a year will automatically be disqualified to continue as a member.

5.5.2 The members may examine the P-Draft document(s) whenever under circulation and offer comments as per the following options:

*The Committee may kindly note.*

7.2 The Department of Pharmaceuticals (DoP) is the nodal department for the strategic Implementation of National Medical Devices Policy (NMDP), 2023. One of the action points under the roadmap for implementation of strategies under the NMDP include adoption and Expansion of Indian Standards for Medical Devices. In this regard, DoP had constituted a Committee for prioritizing the setting of Indian Standards for Medical Devices and deliberated on the list of Medical Devices where Indian Standards need to be formulated.

With reference to Neurosurgery Instruments, Implants & Accessories there is a need to formulate Indian Standards on the following Medical devices:

<b>Sr. No</b>	<b>DOP Topics</b>

## **ITEM 8 TECHNICAL ISSUES**

8.1 There are no specific technical issues to be discussed.

*The Committee may kindly note.*

## **ITEM 9. INTERNATIONAL ACTIVITIES**

### **9.1 Participating (P) Membership in ISO/IEC**

9.1.1 BIS participates in the International Standardization activities of the International Organization for Standardization (ISO) thereby contributing to International Standards development activities. It is a constant endeavor of the Sectional Committees to identify priority areas for participation in International technical committees that are of strategic importance to India and to identify relevant experts who would actively contribute to international standardization. The details of membership held in various Technical Committees/Subcommittees of ISO are given below:

<b>Sl. No.</b>	<b>Liaison Committee of ISO</b>	<b>Type of Membership</b>
1.	ISO TC 150/WG 15 - Neurosurgical implants	Participating Member
2.	ISO/TC 150/ SC 6/WG 5 - Implantable neuro stimulators	Participating Member

9.1.2 As a P-member, it is mandatory for India (BIS) to vote on all draft standards and other documents circulated by ISO seeking votes/comments. The members should carefully examine the documents taking into consideration nation's interests and send the comments to BIS keeping in mind that if these ISO Standards so finalized are adopted as Indian Standards in future, the Indian Medical Device Industry would not have any problem in its implementation. The experts who are not contributing to international standardization by submitting comments/feedback on work items and ballots will not be allowed to represent BIS (India) in ISO/ IEC Technical meetings.

*The Committee may kindly note.*

## **9.2 Participation of Working Group Experts in ISO Technical Committees**

9.2.1 Working Groups (WGs) are established by ISO/IEC Technical Committees for specific tasks. The Experts are nominated in these WGs by BIS ('P' Member National Standards Body – NSB) to deal with specific tasks allocated to the Working Group. Persistently Inactive Experts, meaning the absence of contributions through attendance to WG meetings or by correspondence, will be removed from the Working Groups by ISO Technical Committee. This removal of Inactive Experts would also reflect badly on the 'P' Member NSB. Therefore, participation of nominated Indian Experts at the Working Group level of ISO is of critical importance while being a part of BIS for Standards Development.
