

**ISO IEC SC42 – Plenary and Working Groups Meetings at Seoul
April 22-26, 2024**

Participation Report from Sridharan Sankaran

In addition to participation in opening and closing plenary, I participated in WG3 and JWG2 meetings as below:

Attended JWG2 meeting and participated in the discussions. Discussed about my contribution on "Explainability evaluation for image classification" towards the project "TS 17847-Verification and validation analysis of AI systems" and sought clarifications from Adam Leon Smith on the refinements to be made in the text that I submitted.

Attended WG3 meetings for various projects under WG3 and participated in discussions and comments resolution sessions , wherever required.

Especially, for the project "22443-TS-Artificial intelligence-Guidance on addressing societal concerns and Ethical considerations" under WG3, I contributed towards 2 subsections, namely :-

- 1) Section 5.5-Practices to embed societal concerns and ethical considerations in organizations
- 2) Section 5.6-Practices for managing ethical aspects in AI system lifecycle

I walked the attendees through my contribution and addressed queries from them. These two contributions were well received and widely appreciated. Both the contributions have been accepted by the working group with no modifications.
