Navigation tools for smart manufacturing	EN
Smart manufacturing standards map (SM2) - Part 1: Framework	EN
Smart manufacturing standards map (SM2) - Part 2: Catalogue	EN

Description
IEC SRD 63456:2023 This document proposes external requirements for IT tools dedicated to smart manufacturing, to assist the development of manufacturing systems with international standards through linking reference models, use cases, architecture, and standards.
ISO/IEC TR 63306-1:2020 This document describes the framework and the vocabulary that are used for the development of entries in the Smart Manufacturing Standards Map Catalogue. These enable the mapping and linking of standards and standard projects related to various aspects of smart manufacturing (product, production, supply chain, industrial services ...).
ISO/IEC TR 63306-2:2021 lists smart manufacturing related standards with their characteristics as specified in ISO/IEC TR 63306-1.
