1	Name: Mallika Gope Organisation: N/A	5.1 N/A		1 Technical	Earthing should be made mandatory.	In case GI pipes are used for the purpose of earthing the motor, earthing connection shall be made to the discharge pipe clamps.	
	Email: mallika@nabl.qcin.org Mobile:	16.1 N/A	Note	Editorial	Editorial correction	This test may be conducted at a reduced voltage, when a current at least equivalent to full load current is being taken by the motor.	
	Comment ID #: ETD_2023-07-081109	16.2 N/A	Note	Editorial	Editorial correction	This test may be conducted at reduced voltage, when a current at least equivalent to full load current is being taken by the motor.	
		18.1 N/A		1 General	Punctuation added	The motor shall, whatever their type of construction, be capable of with standing for 10 s without stalling or abrupt change in speed (under gradual increase of torque) an excess torque of 60 percent of the rated torque, the voltage and frequency being maintained at their rated value.	
		19.1 N/A		1 Editorial	typographical correction	The temperature rise test of the motor at rated voltage and supply frequency shall be carried out with the motor coupled to a suitable pump for the full load current and the set run continuously for 1 h till steady state temperature is achieved.	
		20.3 N/A		1 General	Text rearranged for clarity	Since the test is already conducted on the windings for acceptance, it shall, as far as possible, not be repeated. If however it is tested a second time at the laboratory or at the special request of the purchaser, the test voltage shall be 80 percent of the voltage (1200 V) given in 20.2.	
		21.1 N/A		1 Technical	Mega Ohm to be mentioned	The insulation resistance, when the high voltage test is applied, shall be not less than 5 MΩ.
