The Panel may note.

ITEM 3 Inputs received against IS 18112

3.1 Following Inputs have been received related to IS 18112:

- a) “Details of default tuning parameters [ex. details for all transponders, Frequency, DVB Triplet (TSid, network id, service id), Original Network ID]. These details can be added in Section "DTV Receiver Installation"
- b) In the current Spec, there is no particular mentioning about profile name (ex. DD Free Dish / Free Dish / Doordarshan / Prasar Bharti) which can help end user to select his desired DTH operator.

This kind of requirement can be kept under "DTV Receiver Installation" section of IS 18112. Although there is some description in "Remote Control" requirement as below :

j) Free satellite — user shall be able to access FTA satellite channels from any menu by this shortcut key or functionality. This shortcut key or functionality shall also guide user for scanning of satellite channels.

Can you please advice us on the same, what name should we use for the profile of IS 18112 ? DD Free Dish / Free Dish / Doordarshan / Prasar Bharti / Free satellite ??

- c) Request to update Input voltage range in Section 5 & Table 2 (110~240V ==> 220~240V)
- d) Entries related to DVB SSU can be removed from the Spec as this is obsolete technology now.
- e) Details of test suite which include Test methods & test streams to verify IS 18112.”

3.2 Draft revision of IS 18112 is enclosed as Annex-1.

The panel may consider.
