Dear Maam,

 Greetings from NIT Uttarakhand,

 This is to bring to kind attention that there seems to be some misprint in conversion of kPa to N/m^2 in section 4.1 page 1. It is Mentions in bracket that "(1kPa =103N/m^2)" whereas it is expected to be "(1kPa =10^{3}N/m^2)"

Regards,

Shashi Narayan

Dept of Civil Engineering

NIT Uttarakhand
