

Pradeep Singh Shekhawat

Scientist-D / Joint Director,

Bureau of Indian Standards

M.Tech from IIT Roorkee in Building Construction

Currently serving as Scientist-D / Joint Director in the Civil Engineering Department at the Bureau of Indian Standards (BIS), I bring over 12 years of experience in standardization, quality assurance, and certification within the civil engineering and construction sectors.

With more than five years of specialized experience in standardization, I have been instrumental in revising and developing Indian Standards across various civil engineering domains, including roofing, flooring, wall finishes, furniture, builder's hardware, and wood/lignocellulosic products. I have played a key role in shaping standards for wood-panel products, doors & windows, furniture, and builder's hardware.

In addition to my standardization work, I possess seven years of expertise in quality control, quality assurance, and third-party certification, both domestically and internationally. My work spans the certification of a wide range of civil engineering and construction products, including cement, concrete products, concrete reinforcement, building materials, and other sector-specific products.

This unique combination of experience in standardization, quality assurance, and certification equips me with the ability to offer valuable insights into the evolving needs of the civil engineering industry, driving innovation and ensuring quality.
