## About Orcan

An Expert handling the Expert tools could make a immense contribution to the applications success.

The reliability of our products, services & commitment is the key to creating delighted client. We challenge our limits to meet customer Expectations "Why Not ..". if the proposition is Ethical, Reliable & beneficial for all ..then why not.

We supply, program & commission the PLC, HMI & VFD for Machinery manufacturers

We do the machine automation on Turn key basis with wiring of machine, supply of control panel & commissioning of the panel & programming to suit application needs

Retrofitting of OLD machine ,We do complete machine Electrical changeover from the contactor based to PLC, removing all the old wiring, push-buttons, etc putting the new PLC based control panel for trouble free, economical machine operations

## Our Products

## PLC & HMI

## VFD

## SCADA Software

Fully-featured SCADA/HMI software. It can be used for a variety of automation projects, such as the chemical, automotive, building control, agriculture, etc. It supports distributed data acquisition, and supports redundant systems, so as to provide maximum flexibility and reliability.

## Field Instruments

Being in touch with the world class suppliers allows us an access to the cutting edge technologies & reliability in products.

## Control Panels
