8.	Recommendations - On the basis of the analysis of the info available as mentioned above consideration of sectional committee is solicited on the following aspects of the IS under review:		have gone through carefully the IS standard sent to me for review. After a detailed discussion with our team we conclude that the current IS standard on "Specification for Zinc Anodes for Electroplating" needs no revision and hence reaffirmed without any modifications. The current standard covers all the point necessary for the efficient supply of Zinc anodes to the electroplating industries across the nation. Hence, I submit my recommendation to continue the current standards with no new amendments.
