FOREWORD

This Indian Standard (Part 1) was adopted by Bureau of Indian Standards, after the draft finalized by Siddha Sectional Committee had been approved by the Ayush Division Council.

There is a worldwide resurgence of interest in holistic systems of health care, particularly with respect to the prevention and management of lifestyle-related disorders, and chronic, non-communicable, and systemic diseases. It is increasingly understood that no single healthcare system can provide satisfactory answers to all the health needs of modern society. Evidently, there is a need for a new inclusive and integrated healthcare regime that should guide health policies and programmes in the future.

This standard is published in four parts. The other parts in the series are:

Part 2 Standardized terminology for preventive health

Part 3 Standardized terminology for materials

Part 4 Standardized terminology for food

Siddha medicine is an ancient medical system in India and involves a system of regional therapy with geographical significance for the convenience of treatment and comfort of patients. The Siddha system uses herbs, minerals, metals, and organic materials to treat patients based on their unique physiology, environment, and lifestyle factors, including age, gender, race, habits, psychology, habitat, diet, appetite, physical condition, and disease.

In the current scenario of Siddha medicine recognized as one of the comprehensive indigenous health systems, the Standard terminology relating to Siddha medicine will be an essential tool for working on other standards, guidelines, classifications, and regulations, as well as integrating Siddha medicine into mainstream health systems.

This document will facilitate Siddha medicine professionals, policymakers, health workers, service providers, researchers, Siddha medicine manufacturers and the public to use the same concepts, understanding, and definitions in communications, health care services, and medical records. It will support international cooperation in research, information exchange, standards, and classifications in Siddha medicine.

There are several Siddha specific technical terms that are required to be documented in standards covering the scopes of structure and function, preventive health, morbidity, and diagnosis, materials, processes, medicine, food, etc facilitating comprehensive usage. The inputs have been derived from the information available in the public domain in the print and electronic media *inter-alia* the WHO International Standard Terminologies on Siddha medicine available in the National AYUSH Morbidity and Standardized Terminologies Electronic (NAMASTE) Portal, development of standard Siddha terminologies, Siddha pharmacopoeia, Siddha Formulary of India, and authoritative books of Siddha medicine.

The composition of the Committee responsible for the formulation of this standard is given in [Annex A](#).

*Indian Standard***SIDDHA — GLOSSARY OF TERMS****PART 1 STANDARDIZED TERMINOLOGY FOR CORE CONCEPTS****1 SCOPE**

This standard (Part 1) covers the description/definition of terminologies related to fundamental principles/core concepts in Siddha. The original terms appearing in the text have been transliterated into English and defined for the purpose of a clear

understanding of the concept by any person who is not an expert in Siddha. These terms may be used by manufacturers, researchers, academicians, regulators, clinical practitioners, and other enthusiasts interested in the science of the Siddha system of medicine.

Bureau of Indian Standards

BIS is a statutory institution established under the *Bureau of Indian Standards Act, 2016* to promote harmonious development of the activities of standardization, marking and quality certification of goods and attending to connected matters in the country.

Copyright

BIS has the copyright of all its publications. No part of these publications may be reproduced in any form without the prior permission in writing of BIS. This does not preclude the free use, in the course of implementing the standard, of necessary details, such as symbols and sizes, type or grade designations. Enquiries relating to copyright be addressed to the Head (Publication & Sales), BIS.

Review of Indian Standards

Amendments are issued to standards as the need arises on the basis of comments. Standards are also reviewed periodically; a standard along with amendments is reaffirmed when such review indicates that no changes are needed; if the review indicates that changes are needed, it is taken up for revision. Users of Indian Standards should ascertain that they are in possession of the latest amendments or edition by referring to the website-www.bis.gov.in or www.standardsbis.in.

This Indian Standard has been developed from Doc No.: AYD 05 (23533).
