**Document Type: Revision of Indian Standard (IS 10231: 1982)**

*This document has the following salient features which may require specific attention for your valuable comments:*

- 1) The standard was originally published in 1982. While reviewing the standard, it was decided to revise this standard by adopting ISO 7057: 1981 in order to maintain uniformity in the product worldwide and also to facilitate global trade.*

Before using these filter funnels for strong acids and alkalis, oxidizing agents or non-aqueous liquids, or at temperatures outside this temperature range, users should satisfy themselves that the filter funnels are suitable for such applications either by laboratory tests or by reference to the manufacturer or supplier. Plastics filter funnels comply with the requirements of this Standard are marked both with a recommended maximum temperature of use and an indication of the material of construction.*
- 3) This standard specifies requirements for six preferred sizes of plastic filter funnel up to 200 mm in diameter suitable for laboratory use.*
