DRAFT INDIAN STANDARD IN WIDE CIRCULATION

Reference : CHD 34/22990

TECHNICAL COMMITTEE : Environmental Management, CHD 34

To,

All concerned

Dear Madam/Sir,

Document Number : CHD 34 (22990) WC

Title of the document : Monetary valuation of environmental impacts and related environmental aspects

Document Type : New Indian Standard

This document has following salient features which may require specific attention for your valuable comments:

1) *This standard specifies a methodological framework for the monetary valuation of environmental impacts and related environmental aspects. Environmental impacts include impacts on human health, and on the built and natural environment. Environmental aspects include releases and the use of natural resources. In this standard, monetary valuation is a way of expressing value in a common unit, for use in comparisons and trade-offs between different environmental issues and between environmental and other issues. The monetary value to be determined includes some or all values reflected in the concept of total economic value. An anthropocentric perspective is taken, which asserts that natural environment has value in so far as it gives utility (well-being) to humans. The monetary values referred to in this document are economic values applied in trade-offs between alternative resource allocations, and not absolute values*
