DRAFT INDIAN STANDARD IN WIDE CIRCULATION

Reference : FAD 11/T

Date : 15 February 2024

TECHNICAL COMMITTEE : Agricultural Machinery and Equipment, FAD 11

To,

All concerned

Dear Madam/Sir,

The following document has been prepared by the Agricultural Machinery and Equipment Sectional Committee, FAD 11. Please [click here](#) to view the document.

Document Number : FAD 11 (24876) WC

Title of the document : Double action pruning saw - Specification third revision

Document Type : Revision of Indian Standard (IS 3108 : 1991)

This document has following salient features which may require specific attention for your valuable comments:

- 1) The Pruning Saw is one of the essential hand tools, extensively used in tea, coffee and rubber plantation for trimming those twigs and branches which are inconvenient to cut with shears, secateurs or pruning knives. It is also used in orchards and sometimes in vegetable gardens.*
- 2) Nowadays, double action pruning saws are available which combine forward and reverse cutting action. The double action pruning saw with special tooth form results in more efficient cutting, lesser force with higher volume removal of saw dust in each stroke.*
- 3) This standard specifies material dimensions and other requirements for double action pruning saw.*

Please examine the document and share your comments regarding further improvement in the document.

Last date for sharing the comments is : 16 April 2024

The comments should be shared in the prescribed template through this portal only; and the comments so received shall be taken up by the Sectional Committee for necessary action.
