DRAFT INDIAN STANDARD IN WIDE CIRCULATION

Reference: FAD 28/T Date: 23 January 2025

TECHNICAL COMMITTEE: Test methods for food products, FAD 28

To,

All concerned

Dear Madam/Sir,

The following document has been prepared by the Test methods for food products Sectional Committee, FAD 28. Please click here to view the document.

Document Number: FAD 28 (27425) WC

Title of the document: Determination of Vitamin B5 pantothenic acid in foodstuffs by ultra-high performance liquid chromatography and tandem mass spectrometry UHPLCMSMS Method of Test Document Type: Revision of Indian Standard (IS 9840: 1981)

This document has following salient features which may require specific attention for your valuable comments:

1) This standard was first published in 1981 with a title "Method for estimation of pantothenic acid in foodstuffs" in which microbiological method was described for estimation of pantothenic acid in food stuffs. The microbiological method is old and there is a lot of variability in this method so the need was felt to revise the standard. In the first revision of the standard, the microbiological method has been replaced by the method based on ISO 20639:2015 "Infant formula and adult nutritionals — Determination of pantothenic acid by ultra-high performance liquid chromatography and tandem mass spectrometry method (UHPLC-MS/MS)".

Please examine the document and share your comments regarding further improvement in the document.

Last date for sharing the comments is: 22 February 2025

The comments should be shared in the prescribed template through this portal only; and the comments so received shall be taken up by the Sectional Committee for necessary action.
