**Title of the document : Geospatial Information Functional Areas Administrative Boundaries**

**Document Type : New Indian Standard**

*This document has following salient features which may require specific attention for your valuable comments:*

1) *The demarcation and accurate representation of administrative boundaries are essential for effective governance, planning, and decision-making, particularly in Land Resource Management. These boundaries exist at various levels, including International Boundary, State Boundary, District Boundary, Village Boundary, Municipal Boundary, Coastal Zone Regulation & Election constituency. However, the creation, update and maintenance of these boundary data sets involve multiple departments, states, and agencies, resulting in disparate datasets that lack uniformity and interoperability.*
