Document Number : MED 01 (27465) WC

Title of the document : ACCEPTANCE TESTS ON INDUSTRIAL BOILERS CODE OF PRACTICE

Document Type : Revision of Indian Standard (IS 13980 : 1995)

This document has following salient features which may require specific attention for your valuable comments:

1) *The purpose of this code is to establish procedures for conducting acceptance tests on industrial steam generating units and hot water boilers of the water tube type with capabilities larger than 25 tonnes F&A 100 °C of steam per hour, generally as envisaged in Fig. 1. The standard applies to units burning solid fuels fired by hand or by mechanical stokers or pulverized fuel firing equipment as well as liquid or gaseous fuel. It does not apply to packaged boilers which are, 40 a large extent, shop assembled. It also does not apply to dual fired or waste heat units which require a more specialized form of dry and wet gas heat loss measurement. The code lays the procedure to determine: a) Gross thermal efficiency; b) Rating of the units; and c) Other relating operating parameters such as steam temperature and control range.*
