Title of the document : Handpump cum Solar Pumping System - Specifications Amendment - 2

Document Type : Amendment to Indian Standard (IS 17941 : 2022)

This document has following salient features which may require specific attention for your valuable comments:

1) This standard specifies the technical requirements for "handpump cum solar pumping system". This water pumping system is for pumping clear water from the bore well/tube well. The purpose of combining the solar pumping system and the handpump is to reduce efforts to pump water manually and to ensure uninterrupted and continuous access to safe drinking water. This system provides lifting of water to the overhead storage tank. Solar energy is stored in the form of water in an overhead tank thus avoiding the need of a battery system. This standard cover design qualifications and performance specifications.

Please examine the document and share your comments regarding further improvement in the document.
