DRAFT INDIAN STANDARD IN WIDE CIRCULATION

Reference : PCD 25(27070)

Date : 08 December 2024

TECHNICAL COMMITTEE : Lubricants And their Related Products, PCD 25

To,

All concerned

Dear Madam/Sir,

The following document has been prepared by the Lubricants And their Related Products Sectional Committee, PCD 25. Please [click here](#) to view the document.

Document Number : PCD 25 (27070) WC

Title of the document : GEAR LUBRICANTS COMPOUNDED SPECIFICATION Fourth Revision of IS 2297

Document Type : Revision of Indian Standard (IS 2297 : 1997)

This document has following salient features which may require specific attention for your valuable comments:

- 1) This standard prescribes the requirements, methods of sampling and test for the gear lubricants intended for use in worm gear drives. These lubricants are primarily intended for use in enclosed and semi-enclosed worm gears operating under such conditions of load, temperature and sliding speed for which straight mineral oils are not adequate and EP (extreme pressure) type oils are not called for. These are, however, NOT SUITABLE for lubrication of hypoid gears. The lubricants covered by this standard are equivalent to the service designation API-GL-2.*
- 2) The fourth revision has been brought out to keep pace with the latest technological developments and international practices. In this revision, the following changes have been made: a) The composition requirement of the material has been modified; and b) New requirements added – Four ball wear scar diameter, four ball weld load, and biodegradability (optional).*

Please examine the document and share your comments regarding further improvement in the document.

Last date for sharing the comments is : 06 February 2025
