## DRAFT INDIAN STANDARD IN WIDE CIRCULATION

Reference : PCD 18 (27386)

Date : 16 January 2025

**TECHNICAL COMMITTEE : Fragrance and Flavour , PCD 18**

To,

All concerned

Dear Madam/Sir,

The following document has been prepared by the Fragrance and Flavour Sectional Committee, PCD 18. Please [click here](#) to view the document.

**Document Number : PCD 18 (27386) WC**

**Title of the document : OIL OF CARROT SEED SPECIFICATION**

**Document Type : New Indian Standard**

*This document has following salient features which may require specific attention for your valuable comments:*

1) Carrot seed oil is the essential oil extract of the seed from the carrot plant *Daucus carota*. The oil has a woody, earthy sweet smell and is yellow or amber-coloured to pale orange-brown in appearance. Rather than the extract the distilled (ethereal) oil is used in perfumery and food aromatization. The main constituent of this oil is carotol. Pressed carrot seed oil is extracted by cold-pressing the seeds of the carrot plant. The properties of pressed carrot seed oil are quite different from those of the essential oil. This draft standard prescribes the requirements and the methods of sampling and tests for oil of carrot seed, *Daucus carota*.

Please examine the document and share your comments regarding further improvement in the document.
