**Document Number : PGD 33 (26086) WC**

**Title of the document : Calculation of load capacity of spur and helical gears Part 2: Calculation of surface durability pitting**

**Document Type : New Indian Standard**

*This document has following salient features which may require specific attention for your valuable comments:*

*1) This document specifies the fundamental formulae for use in the determination of the surface load capacity of cylindrical gears with involute external or internal teeth. It includes formulae for all influences on surface durability for which quantitative assessments can be made. It applies primarily to oil-lubricated transmissions, but can also be used to obtain approximate values for (slow-running) grease-lubricated transmissions, as long as sufficient lubricant is present in the mesh at all times.*

Please examine the document and share your comments regarding further improvement in the document.
