Sub: Providing Backgrounds/genesis of any new project proposal along with detailed justification AND Benefits to be accrued by BIS on implementation of the project – Reg.

While reviewing/examining the project proposals taken up by various departments of BIS as proponent department by Vigilance Department it has been observed that in most of the proposals background/genesis of the idea or the project has not been made a part of the project proposal by the proponent department. Further, a detailed justification vis-a-vis mode of execution and benefits to be accrued by BIS had also not been made a part of the project proposal.

Since these are considered to be essential inputs while making any proposal for consideration of higher authorities, I have been directed to say you that it may be ensured that any new project proposal shall invariably have these components in the proposals to be made by respective proponent department.

The above is to be implemented strictly by all departments at BIS HQs as well as ROs/BOs/Labs.

(ROMA ROY)

Deputy Director General (Admn.)
