

b) The symbols for mixed types of rocks are derived by combining suitably elementary symbols (see Table 1) and the basic symbols (see Table 2).

3.2.2 The symbols for different rock types commonly met with in engineering practice are given in Table 3. Symbols for rock types not given

in this table may be developed on the basis of the principles laid down in 2.3 and 3.2.1.

3.2.3 Where features are too small for graphical representation either an asterisk may be given against the feature and explained in the legend or the name of the rock written out.

The headings are correct kindly revert back without the comment yellow mark
