## NATIONAL FOREWORD

This Indian Standard (Second Revision) which is identical with IEC 60851-3:2023 ‘Winding wires – Test methods – Part 3: Mechanical properties’ Issued By The International Electrotechnical Commission (IEC) was adopted by the Bureau of Indian Standards on the recommendation of the Winding Wire Sectional Committee and approval of the Electrotechnical Division Council.

This standard was originally published in 1993 and subsequently revised in 2012. The second revision of this standard has been undertaken to align it with the latest version of IEC 60851-3:2023.

The text of the IEC Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appears referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker, while in Indian Standards the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to International Standards for which Indian Standards also exists. The corresponding Indian Standards, which are to be substituted, are listed below along with their degree of equivalence for the editions indicated:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
IEC 60851-2:2009, Winding wires – Test methods – Part 2: Determination of dimensions	IS 13778 (Part 2) : 2013/ IEC 60851-2:2009 Winding wires - Test methods: Part 2 determination of dimensions (First Revision)	Identical
ISO 178:2019, Plastics – Determination of flexural properties	IS 13360 (Part 5/Sec 7) : 2022/ ISO 178:2019 Plastics method of testing Part 5 mechanical properties Section 7 Determination of flexural properties	Identical

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test, shall be rounded off in accordance with IS 2: 2022 ‘Rules for rounding off numerical values (*second revision*)’. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.
