FOREWORD

This Indian Standard (First Revision) was adopted by the Bureau of Indian Standards, after the draft finalized by the Slaughter House and Meat Industry Sectional Committee had been approved by the Food and Agriculture Division Council.

Pig hooks, also known as gambrels, are an important tool used in slaughter houses during the processing of pigs. Pig hooks are used to suspend and hang pig carcasses in a secure and stable manner. Pig hooks play a crucial role in a slaughterhouse by facilitating the handling, transportation, bleeding, inspection, and processing of pig carcasses.

In order to provide guidance to manufacturers and facilitate quality manufacturing of pig hooks, this Indian Standard was originally published in the year 1973. In this revision, the raw material requirement of the hook has been modified in order to align the requirements with latest technological advancements and industrial practice. Also, the standard has been brought out in the latest style and format of the Indian Standards.

The composition of the Committee responsible for the formulation of this standard is given in [Annex A](#).

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 2022 'Rules for rounding off numerical values (*second revision*)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

Indian Standard
PIG HOOKS — SPECIFICATION
(First Revision)

1 SCOPE

This standard specifies requirements in respect of material, dimensions, strength and other requirements of S-shaped pig hooks.

2 REFERENCES

The standards given below contain provisions which through reference in this text, constitute provision of this standard. At the time of publication, the editions indicated were valid. All standards are subject to revision and parties to agreements based on this standard are encouraged to investigate the possibility of applying the most recent editions of these standards:

<i>IS No.</i>	<i>Title</i>
IS 6628 : 2023	Slide rails for use in abattoirs — Specification (<i>first revision</i>)
IS 6911 : 2017	Stainless steel plate, sheet and strip — Specification (<i>second revision</i>)

3 REQUIREMENTS**3.1 Material**

Pig hook shall be made of stainless steel of designation SS 304 (Austenitic X04Cr19Ni9) or SS 316 (Austenitic X04Cr17Ni12 Mo2) conforming to IS 6911.

3.2 Dimensions

Dimensions of S-shaped pig hooks is given in [Fig. 1](#) for guidance.

3.3 The weight of a hook shall be $185 \text{ g} \pm 5 \text{ percent}$.

3.4 The hook shall not bend when a load of 120 kg is applied.

3.5 Workmanship and Finish

The hook shall be free from flaws, burrs, pits and sharp edges and should be of uniform weight.

4 MARKING

4.1 Manufacturer's name or trade-mark and batch or code number embossed at a convenient place.

4.2 BIS Certification Marking

The product(s) conforming to the requirements of this standard may be certified as per the conformity assessment schemes under the provisions of the *Bureau of Indian Standards Act, 2016* and the Rules and Regulations framed thereunder, and the products may be marked with the Standard Mark.

5 PACKING

The hooks shall be packed in wooden boxes or as agreed to between the manufacturer and the purchaser.

6 SAMPLING

The method of drawing representative samples of pig hooks and the criteria for conformity shall be as given in IS 6628.

Bureau of Indian Standards

BIS is a statutory institution established under the *Bureau of Indian Standards Act, 2016* to promote harmonious development of the activities of standardization, marking and quality certification of goods and attending to connected matters in the country.

Copyright

BIS has the copyright of all its publications. No part of these publications may be reproduced in any form without the prior permission in writing of BIS. This does not preclude the free use, in the course of implementing the standard, of necessary details, such as symbols and sizes, type or grade designations. Enquiries relating to copyright be addressed to the Head (Publication & Sales), BIS.

Review of Indian Standards

Amendments are issued to standards as the need arises on the basis of comments. Standards are also reviewed periodically; a standard along with amendments is reaffirmed when such review indicates that no changes are needed; if the review indicates that changes are needed, it is taken up for revision. Users of Indian Standards should ascertain that they are in possession of the latest amendments or edition by referring to the website-www.bis.gov.in or www.standardsbis.in.

This Indian Standard has been developed from Doc No.: FAD 18 (22982).
