#### Textile Machinery and Accessories Sectional Committee, TXD 14

#### FOREWORD

This Indian Standard (First Revision) was adopted by the Bureau of Indian Standards, after the draft finalized by the Textile Machinery and Accessories Sectional Committee had been approved by the Textiles Division Council.

A shuttle was a tool designed to neatly and compactly store a holder that carries the thread of the weft yarn while weaving with a loom. Shuttles are thrown or passed back and forth through the shed, between the yarn threads of the warp in order to weave in the weft.

This standard was first published in 1971. The revision has been bought out to incorporate the following changes:

- a) Forward has been incorporated;
- b) Reference clause has been incorporated;
- c) Marking clause has been modified; and
- d) Packing and sampling clauses have been incorporated.

The composition of the Committee responsible for the formulation of this standard is given in Annex A.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 2022 'Rules for rounding off numerical values (*second revision*)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

# Indian Standard

# TEXTILES — ACCESSORIES FOR USE IN SHUTTLES FOR JUTE LOOMS — SPECIFICATION

(First Revision)

# **1 SCOPE**

This standard prescribes requirements of accessories, such as offset tip, cover, cover lock, drag spring, pin and bristles for use in shuttles for jute looms.

# **2 REFERENCES**

The standards given below contain provisions which through reference in this text, constitute provisions of this standard. At the time of publication, the editions indicated were valid. All standards are subject to revision and parties to agreements based on these standards are encouraged to investigate the possibility of applying the most recent edition of these standards:

IS No.	Title	
IS 2500 (Part 1) : 2000/ISO 2859-1 : 1999	Sampling procedure for inspection by attributes: Part 1 Sampling schemes indexed by acceptance quality limit (AQL) for lot- by-lot inspection ( <i>third</i> <i>revision</i> )	

# **3 REQUIREMENTS**

# 3.1 Offset Tip

Offset tip should be either single or double shank.

3.1.1 Material

3.1.1.1 Single shank

Single shank should be low carbon steel.

3.1.1.2 Double shank

Double shank should be malleable cast iron with hardness at flat and conical portion from 110 HRB to 125 HRB. The shanks should be softer than the rest of the portion.

#### 3.1.2 Shape and Dimension

The dimensions of the offset tip of a typical pattern shall conform to the applicable requirements given in Fig. 1.

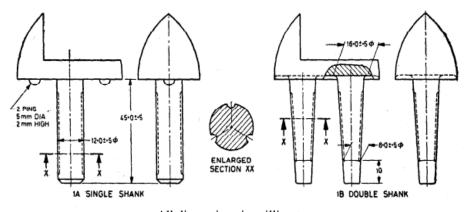

#### 3.2 Cover

#### 3.2.1 Material

Hot-rolled spring steel of 17 SWG case, hardened at both ends up to approximately 10 cm from either end and having hardness between 40 HRC to 50 HRC.

#### 3.2.2 Shape and Dimension

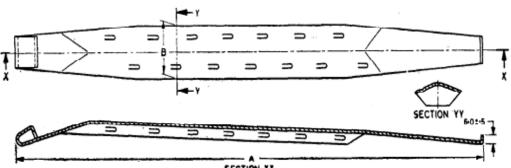

The dimensions of the cover of shuttle of a typical pattern shall conform to the applicable requirements given in Fig. 2.

All dimensions in millimetres. FIG. 1 OFFSET SHUTTLE TIP

SECTION XX

All dimensions in millimetres.

FIG. 2 SHUTT	LE COVER
--------------	----------

Sl No.	Length A	Width B
(1)	(2)	(3)
i)	381	38
ii)	406	38
iii)	432	38
iv)	457	38
Tolerance, mm	$\pm 2.0$	$\pm 1.0$

#### 3.3 Cover Lock

3.3.1 Material

Spring steel of 16 SWG.

#### 3.3.2 Shape

A typical type of cover lock is shown in Fig. 3.

# **3.4 Drag Spring**

#### 3.4.1 Material

Spring steel of 28 SWG having hardness between 38 HRC to 40 HRC.

#### 3.4.2 Shape

A typical type of drag spring is shown in Fig. 4.

# 3.5 Eye

# 3.5.1 Material

It shall preferably be made of porcelain glazed inside or any other suitable material with smooth surface inside. The ends of the eye shall be rounded off.

# 3.5.2 Shape

A typical type of eye is shown in Fig. 5.

# 3.6 Pin

Pins for cover and cover lock shall be made of 8 SWG steel wire. Other pins used in the shuttle may be made of steel wire of fine gauge or as agreed to between the buyer and the seller.

# **3.7 Bristles**

Shall be of nylon monofilament.

# **4 SAMPLING**

Unless otherwise agreed to between the buyer and the seller, to ascertain the conformity of product(s) to the requirements of this specification, or as specified in IS 2500 (Part 1) shall be followed.

# **5 MARKING**

**5.1** Each accessory shall be marked with the following information:

- a) Manufacturer's name, initials or trademark;
- b) Indication of the source of manufacture;
- c) Gross and net mass;
- d) Lot/batch number;
- e) Country of origin; and
- f) Date of manufacture.

# **5.2 BIS Certification Marking**

The product(s) conforming to the requirements of this standard may be certified as per the conformity assessment schemes under the provisions of the *Bureau of Indian Standards Act*, 2016 and the Rules

and Regulations framed thereunder, and the products may be marked with the Standard Mark.

#### **6 PACKING**

The accessories shall be packed as agreed to between the buyer and the seller.

#### **Bureau of Indian Standards**

BIS is a statutory institution established under the *Bureau of Indian Standards Act*, 2016 to promote harmonious development of the activities of standardization, marking and quality certification of goods and attending to connected matters in the country.

#### Copyright

**Headquarters:** 

BIS has the copyright of all its publications. No part of these publications may be reproduced in any form without the prior permission in writing of BIS. This does not preclude the free use, in the course of implementing the standard, of necessary details, such as symbols and sizes, type or grade designations. Enquiries relating to copyright be addressed to the Head (Publication & Sales), BIS.

#### **Review of Indian Standards**

Amendments are issued to standards as the need arises on the basis of comments. Standards are also reviewed periodically; a standard along with amendments is reaffirmed when such review indicates that no changes are needed; if the review indicates that changes are needed, it is taken up for revision. Users of Indian Standards should ascertain that they are in possession of the latest amendments or edition by referring to the website-www.bis.gov.in or www.standardsbis.in.

This Indian Standard has been developed from Doc No.: TXD 14 (24690).
