Homoeopathy Sectional Committee, AYD 07

## FOREWORD

This Indian Standard was adopted by the Bureau of Indian Standards after the draft finalized by the Homoeopathy Sectional Committee had been approved by the Ayush Division Council.

Homoeopathy, a system of medicine originating in the late 18<sup>th</sup> century, drew upon prevalent ideas and concepts of that era. The terms utilized today were initially translated from German in the original 18<sup>th</sup> century writings. Many of these words and expressions have evolved from their original meanings and have taken on new connotations within the context of homoeopathic practice.

These terminology standards have been developed to cater to the needs of pharmaceutical professionals, practitioners, academicians, students, and the public.

The aim is to provide standardized definitions for these terms as they pertain to homoeopathic practice, prescriptions, pharmaceutical preparations, and homoeopathic philosophy. This standardization is intended to facilitate better understanding and consistent usage among various stakeholders. This document is not a treatise on homoeopathic philosophy and practice; therefore, operational modalities in the concepts are not elaborated upon.

The definitions presented here have been drawn from authoritative sources such as the Homoeopathic Thesaurus of the European Committee for Homeopathy (2016), the Homoeopathic Pharmacopoeia of India, incorporating an understanding of writings of renowned figures in homoeopathy, including Dr. Samuel Hahnemann, Dr. J T Kent, Dr. Stuart Close, and Dr. B K Sarkar. All efforts are made to compile the different ideas given by the authorities into single definitions.

All definitions are attempted to be in the contemporary English language for better understanding across different stakeholders.

Issues have been raised by various stakeholders regarding the spelling of 'Homoeopathy'. The system is also spelled as Homeopathy in some parts of the world. Currently, the legislature in India uses the spelling Homoeopathy in all its legislative and regulatory documents, which are mandatory provisions. BIS, though it considers the contemporary structure, does not attempt to create a terminology and spelling debate and, therefore, uses the spelling 'Homoeopathy' only in the title and elsewhere. ~~The different spellings are, however, mentioned along with the main term.~~

The terminologies in this document are arranged alphabetically to avoid hierarchical conflicts, and it is not a thesaurus/indexing document to provide a tree format of terms. The terms that have substantial overlap between modern medical terminology and their usage in homoeopathy have not been included in this compilation.

It's important to note that these standards are subject to any relevant rules and regulations that may apply. It's also worth mentioning that these definitions do not encompass the operational mechanisms and procedures associated with the terms.

The composition of the Committee responsible for the formulation of this standard is given in Annex A.

Indian Standard

~~GLOSSARY OF TERMS IN HOMOEOPATHY~~ — GLOSSARY OF TERMS  
STANDARDIZED TERMINOLOGY FOR COMMONLY USED TERMS  
RELATED TO HOMOEOPATHY

1 SCOPE

This standard covers a brief description/definition of commonly used terminologies relevant to homoeopathy.

2 TERMINOLOGY

2.1 Acute Disease

— An illness with rapid onset tends to finish its course in a short period of time. It can be in the form of a sporadic ~~illness~~, endemic ~~illness~~, ~~or~~ epidemic ~~condition~~ or pandemic magnitude.

2.2 Aggravation

— Worsening or increase in severity, ~~or~~ intensity, ~~or~~ frequency, or duration of symptoms, sensations, signs, or general condition of an individual.

This aggravation can be:

2.2.1 Disease Aggravation

— An increase in intensity or severity of a existing disease condition.

2.2.2 Medicinal Aggravation

— An increase in intensity or appearance of new symptoms ~~in response~~ due to the medicine given for the treatment.

2.2.3 Homoeopathic Aggravation

— A transient aggravation of existing symptoms ~~but~~ with the general well-being of the patient. It is essentially an immune response of the body to the similimum. The symptoms follow the natural course of the disease, leading to ~~complete~~ recovery.

2.3 Amelioration

— Any improvement in the severity, frequency, duration, or intensity of the existing symptoms, sensations, and signs of the patient.

2.4 Anamnesis

— Anamnesis is the process of aggregation of information gathered during a thorough history-taking, considering every minute aspect in detail, which is used for the repertorization and prescribing the similimum.

2.5 Antidotes

— Substances or drugs which, when taken, nullify the effect of a medicine given to an individual.

2.6 Aqua Purificata

— Purified water used for the preparation and dispensing of medicines other than those that are required to be both sterile and pyrogenic free.

2.7 Artificial Disease

— Artificial disease is described in the Organon of Medicine in Aphorism ~~§~~ 29 and ~~§~~ 74 in different contexts.

Commented [I1]: Kindly review

Commented [I2R1]: This is the symbol for "aphorism".  
Now deleted.

An artificial morbid affection develops following administration of a medicinal agent selected on account of accurate similarity of symptoms used in potentized form, which is similar to the natural disease and is overcome by the natural healing reaction of the individual, leading to cure (Aphorism § 29).

Artificial chronic disease is produced by prolonged use of violent heroic drugs in large and increasing doses, ~~usually seen with Allopathic treatment~~, which leads to organic alteration (Aphorism § 74)

### 2.8 Autosodes

— A homoeopathic preparation in potentized form from pathological discharges or substances of an individual, used for treatment in the same individual.

### 2.9 Aversions

— Strong and specific dislikes related to food, drinks, environmental factors, situations, and activities that may or may not affect the individual's health.

### 2.10 Basic Research/Fundamental Research in Homoeopathy

— Research concerned with fundamental aspects of Homoeopathy. These include studies conducted in basic sciences such as mathematics, chemistry, physics, biology, genomics, etc., validating the drugs, medicines, and principles of homoeopathy. These include but are not limited to studies on the mechanistic action of homoeopathy, physicochemical properties, pharmacological properties, biological action, the use of high dilutions in environmental, microbiological, plant, or animal models, and models based on basic scientific principles.

### 2.11 Biochemic Drugs/Schüssler Tissue Salts/Tissue Remedies

— Triturated preparations of 12 inorganic salts developed by Dr Schussler (1821 ~~to~~ 1895), a German physician. The drugs are prescribed based on the premise that an illness is caused by a deficiency of these salts and is corrected by giving these salts in low potencies as indicated by the characteristic symptoms. These 12 biochemic drugs are Calcarea fluorica, Calcarea phosphorica, Calcarea sulphurica, Ferrum phosphoricum, Kalium muriaticum, Kalium phosphoricum, Kalium sulphuricum, Magnesia phosphorica, Natrum muriaticum, Natrum phosphoricum, Natrum sulphuricum, Silicea.

### 2.12 Boenninghausen Method

— A case analysis method developed by Dr. CMF ~~Von von~~ Boenninghausen (1785- ~~to~~ 1864), a European physician. ~~The This~~ method involves analysis and evaluation of the case based on 'Complete Symptom', which includes location(s), sensation(s), modality(ies), and concomitant(s). The theory of grand generalization is used to complete the symptoms, i.e., what is true to a part is true to a whole.

### 2.13 Bowel Nosodes

— Group of homoeopathic drugs (~~nosodes~~) prepared from ~~endotoxins~~ or ~~exotoxins~~ of human intestinal flora, (~~culturing non~~-lactose fermenting bacteria) in a favourable liquid broth medium. This process was invented by Dr Edward Bach (1886- ~~to~~ 1936) and was further developed by Dr John Paterson (1822- ~~to~~ 1880) and Dr Elizabeth Paterson (1874- ~~to~~ 1963).

### 2.14 Case Analysis

— A step undertaken by a physician to find the most suitable medicine by identifying the characteristics of the clinical picture of a patient, which includes the lifetime history of the evolution of the disease. The symptoms and signs of the patient are segregated in a specific method (for example, Kentian method, Boenninghausen method, etc.) and are correlated with the characteristics in the homoeopathic Materia Medica. This may or may not involve the use of repertory.

### 2.15 Causa Occasionalis

— Maintaining or exciting cause; referring to the idea that certain external factors or events can trigger or influence a person's illness (exciting cause) or can maintain it (maintaining cause).

### 2.16 Characteristic Symptom(s)

Formatted: Space After: 9 pt

Formatted: Space After: 9 pt

Formatted: Space After: 9 pt

Formatted: Space After: 9 pt

Formatted: Space After: 9 pt

Formatted: Space After: 9 pt

Formatted: Space After: 9 pt

Formatted: Space After: 9 pt

Formatted: Space After: 9 pt

— The characteristic symptom is identified as a symptom or a sign that is ~~more particularly~~ striking, singular, uncommon, and peculiar to which the symptoms of the selected medicine must correspond. These are well-marked and have a typical feature(s), attribute(s), or trait(s), which serve as a distinguishing peculiarity of an individual.

**2.17 Chronic Disease**

— Diseases with ~~small, often~~ imperceptible beginnings that continue to derange the health of an individual, usually for a long duration, and terminate in death unless treated with proper anti-miasmatic remedies.

Formatted: Space After: 9 pt

**2.18 Classical Homoeopathy**

— Method of prescribing, wherein a single homoeopathic medicine is used in an appropriate dosage form, based on the totality of symptoms of the patient in accordance with homoeopathic principles defined in the organon of medicine.

**Formatted:** Left, Space After: 9 pt, Line spacing: Multiple 1.08 li, Border: Top: (No border), Bottom: (No border), Left: (No border), Right: (No border), Between : (No border)

**2.19 Clinical Homoeopathy**

— Method of homoeopathic therapeutics in which homoeopathic medicine is selected according to the clinical diagnosis and the corresponding indications based on somatic symptoms, organ affinities, tissue affinities, disease affinity, etiological prescribing, or specifics.

**Formatted:** Space After: 9 pt

**2.20 Clinical Research in Homoeopathy/-Homoeopathic Clinical Research**

— Clinical research is clinical investigations on humans and animals using homoeopathic drugs (or drugs prepared as per homoeopathic principles) to establish the safety and efficacy of diagnostic, therapeutic, or prophylactic drugs or techniques, as well as to collect epidemiological data.

**Formatted:** Space After: 9 pt

**2.21 Clinical Trial in Homoeopathy/-Homoeopathic Clinical Trial**

— Systematic study of homoeopathic drugs or investigational homoeopathy products (IHP) on participants (whether patients or healthy volunteers) to discover or verify the clinical, pharmacological (including pharmacodynamics/-pharmacokinetics), ~~the~~ action of drugs with the objective of determining their safety and/or efficacy and/or clinical utility.

**Formatted:** Space After: 9 pt

**2.22 Clinical Validation**

— A method by which the pathogenesis of ~~the~~ drugs is confirmed in pre-identified clinical conditions and diseases to evolve-develop more precise and confirmed prescribing indications for the drugs used in homoeopathy.

**Formatted:** Space After: 9 pt

**2.23 Clinical Verification**

A process of applying ~~ieation~~ application of drugs based on symptoms to confirm that the symptoms produced during drug proving in healthy persons are alleviated by the same drug in persons with the disease. ~~The~~ This process identifies the clinical utility of the drugs in different disease conditions and the symptomatology of the patients on which future prescriptions can be made ~~based~~.

**Formatted:** Font: Complex Script Font: +Body CS (Mangal), 11 pt, Not Bold

**Formatted:** Space After: 9 pt

**2.24 Comparative Materia Medica**

Comparative study or comparisons of the drug pictures of closely running homoeopathic medicines to identify the similarities and dissimilarities between them.

**Formatted:** Font: Complex Script Font: +Body CS (Mangal), 11 pt, Not Bold

**Formatted:** Space After: 9 pt

**2.25 Complementary Effects**

The effects of certain homoeopathic drugs that augment (assist or reinforce) the action of the previously prescribed medicine, which has acted and tends to complete the action of the previous medicines.

**Formatted:** Font: Complex Script Font: +Body CS (Mangal), 11 pt, Not Bold

**Formatted:** Space After: 9 pt

**2.26 Concomitant Symptoms**

Symptoms manifesting ~~themselves~~ simultaneously or in succession with the chief complaint ~~which has now~~ without any physiological or pathological relation with ~~the latter~~.

**Formatted:** Space After: 9 pt

**2.27 Constitution**

— Unique morphological, physiological, and psychological characteristics of an individual, ~~and a combination of these~~ having a balance and functional output of its own, a given capacity for adaptation, and a mode of reaction towards its environmental stimuli. ~~It is a peculiar group of~~ These qualities and tendencies are determined by the inherent peculiarities of the individual and by the influences exercised by the environment upon the individual.

**Formatted:** Space After: 9 pt

€ Case analysis based on the study of ~~the a~~ patient's constitution is called constitutional analysis. Prescription based on the assessment of the constitution is called constitutional prescribing. Medicines that match a patient's constitution ~~are is~~ called constitutional medicine. A homoeopathic medicine prescribed based on the constitutional characteristics of an individual is known as a constitutional remedy.

IS XXXXX : 2024

|

**2.28 Desires**

— Strong and specific likes related to food, environmental factors, situations, and activities which may or may not affect the individual's health but may be associated with ~~their~~ the physical or emotional comfort ~~of the individual.~~

Formatted: Left, Space After: 9 pt, Line spacing: Multiple 1.08 li, Border: Top: (No border), Bottom: (No border), Left: (No border), Right: (No border), Between : (No border)

**2.29 Diathesis**

— A mental or physical (~~inherited or acquired~~) chronic predisposition or disease state, ~~which can be inherited or acquired.~~

Formatted: Space After: 9 pt

**2.30 Diluent**

— A neutral vehicle, used to prepare ~~dilutions~~ dilution while preparing homoeopathic drugs.

Formatted: Space After: 9 pt

**2.31 Dilution/Attenuation**

— Reduction of ~~the~~ concentration of a substance or mixture of substances by adding suitable vehicles. ~~By~~ ~~†~~ ~~This~~ ~~this~~ process, ~~there occurs a decrease~~ decrease in the quantity of the original matter in a given portion of the mixture/solution, ~~and at the same time, while also reducing its physical and chemical properties are reduced.~~

Formatted: Space After: 9 pt

~~The potentized liquid homoeopathic preparations are also called dilutions.~~

~~In homoeopathy, the packed liquid preparations, prepared by the method of succussion as per the scale, are also called dilutions.~~

**2.32 Direction of Cure/-Law of Cure/-Hering's Law of Cure/-Hering's Rule**

— Progressive improvement in a patient's state is indicated by directional changes in the symptoms from above downwards, from within outwards, from more vital to less vital organs, and in the reverse order of their appearance.

Formatted: Space After: 9 pt

**2.33 Dispensing Material**

Homoeopathic medicines prepared in liquid potencies are dispensed by adding liquid ~~medicine~~ or solid ~~medicine to the~~ dispensing ~~material~~ medium. This ~~material-medium~~ may be purified water, sugar of milk, sugar globules, tablets of neutral material or other forms depending upon the application of the medicines. The medicines used orally are added in sugar globules and dispensed in plastic or glass bottles, usually labeled with the name of the medicine and its potency. The dosage for oral medicines is identified as the number of globules or drops of medicine to be taken at a time.

Formatted: Space After: 9 pt

**2.34 Doctrine of Signature**

— A postulate that was first proposed in the middle ages ~~according to which, suggesting that~~ the external characteristics of a substance can indicate its possible therapeutic effects by matching its physical appearance or characteristics with the body organs that it ~~appears similar to~~ resembles.

Formatted: Space After: 9 pt

**2.35 Dosage Form**

— ~~Liquid, solid, or semisolid (cream, ointments, gels, etc)~~ ~~The~~ form in which the patient is advised to use the prescribed medicine(s), ~~including liquid, solid, or semisolid (such as dilutions, globules, cream, ointments, gels, etc.)~~.

Formatted: Space After: 9 pt

**2.36 Drug Affinity/-Sphere of Action**

— The attraction between a drug and part of an organism (maybe receptor, tissue, organ, or system). It refers to how strongly a drug tends to affect a body organ or system. Based on the affinity of a drug, ~~†e. that is~~, its organ affinity or tissue affinity, the sphere of action is defined.

Formatted: Space After: 9 pt

**2.37 Drug disease**

— Diseases which are induced by drugs.

Formatted: Space After: 9 pt

**2.38 Drug Families/-Family Relationships**

Formatted: Space After: 9 pt

**IS XXXXX : 2024**

— A group of homoeopathic medicines belonging to a particular class by virtue of its chemical composition or source used. This may include family/-genus/-species of plants or animals such as Liliaceae, chemical constituents such as Kali salts (having potassium cation), or biological families such as snake medicines derived from snake venoms, etc.

**2.39 Drug Pathogenesis**

— Mechanism by which a drug produces its patho-physio-psycho-behavioral effects or influences in the development and/or progression of a disease condition in an individual.

Formatted: Left, Space After: 9 pt, Line spacing: Multiple 1.08 li, Border: Top: (No border), Bottom: (No border), Left: (No border), Right: (No border), Between : (No border)

**2.40 Drug Picture/Remedy Picture**

— Group of symptoms belonging to a specific medicine comprising all the recorded characteristic symptoms and signs ~~that for which~~ the medicine can be used ~~for to~~ treating an individual. It includes the constitution, sphere of action, pharmacological action, symptoms produced during drug proving, toxicological symptoms, and clinical symptoms.

Formatted: Space After: 9 pt

**2.41 Drug Proving/—Homoeopathic Pathogenetic Trials (HPT)/—Experimental Pathogenesis (EP)/—Homoeopathic Drug Proving (HDP)**

— Drug proving is a process unique to Homoeopathy and is a preliminary step of inclusion of a drug in Homoeopathy. Controlled trials are conducted on healthy human volunteers (called Provers) ~~with using~~ a drug prepared according to homoeopathic pharmaceutical techniques to identify symptoms and signs developing in the volunteers, which forms the proving data (proving symptoms) of the drug.

Formatted: Space After: 9 pt

**2.42 Drug relationships/—Concordance/—Drug interactions/—Relationship of Drugs**

— The interactive relationship of different homoeopathic drugs may have beneficial or detrimental effects on the organism. The relationship also guides towards remedies that should precede or succeed drugs for a favorable result. These can be antidotes, inimical, complementary to, cognates, follows well, followed by, relieves ailments from, etc.

Formatted: Space After: 9 pt

**2.43 Eliminating Symptoms**

— A characteristic symptom of the patient due to its peculiarity in the case is chosen as the defining criterion for determining the similimum and to eliminate closely running medicines which do not include that symptom prominently in their therapeutics or drug proving records.

Formatted: Space After: 9 pt

**2.44 Essence of the Remedy/—Genius of the Remedy/—Remedy Essence**

— The unique character of a medicine that gives its individuality. ~~It is considered and serves~~ as the central theme, around which the symptomatology of the drug revolves. The patient must exhibit these characteristics for the ~~prescribing-prescription~~ of such remedies or finding the similimum.

Formatted: Space After: 9 pt

**2.45 Evaluation of Symptoms/—Grading of Symptoms/—Hierarchization of Symptoms**

— A process of ~~segregation-segregating~~ and ~~relative~~-ranking of symptoms and signs gathered during case taking based on their significance and intensity utilized for repertorization and ~~choice-selection~~ of ~~accurate~~ remedy.

Formatted: Space After: 9 pt

**2.46 Excipients**

— Inert substances (like lactose, purified water, ethyl alcohol, etc.) used as diluents to ensure dilution, preservation, and stability in homoeopathic drug preparation.

Formatted: Space After: 9 pt

**2.47 General Symptoms/—Generalities**

— Symptoms ~~that are~~ not descriptive of the local pathology, but relate to the patient as a whole. ~~for~~ For example, bodily reactions to the environment, mental and physical states, aversions and desires, body secretions and discharges, and modalities ~~etc.~~

Formatted: Space After: 9 pt

**2.48 Genus Epidemicus/—Epidemic Remedy**

— A remedy that is found to be indicated in most cases of the same disease during ~~ana period of~~ outbreak (epidemic or pandemic) by identifying symptoms ~~in-common to~~ many cases of similar conditions. Such medicine can be used ~~both as a preventive as well as and as a~~ curative for that particular outbreak.

Formatted: Space After: 9 pt

**2.49 Globules**

— These are solid, globular preparations in different sizes made from sucrose or a combination of sucrose and lactose used as a vehicle for homoeopathic medicines intended for oral use.

Formatted: Space After: 9 pt

IS XXXXX : 2024

|

## 2.50 Good Clinical Practice Guidelines for Clinical Trials in Homoeopathy/-GCP Homoeopathy

— A standard document ~~identifying~~ outlining a comprehensive set of minimum standards for ~~undertaking~~ conducting clinical, public health, social and behavioral research using homoeopathic medicines or new substances to be incorporated in Homoeopathy.

**Formatted:** Left, Space After: 9 pt, Line spacing: Multiple 1.08 li, Border: Top: (No border), Bottom: (No border), Left: (No border), Right: (No border), Between : (No border)

## 2.51 Grades of Medicines

— A hierarchical representation of the medicines in the form of different ~~typography~~ typographies of the medicines based on the ~~basis of~~ validation of their ~~use~~ clinical use, to ~~give an indication~~ indicate of their importance under specific rubrics in repertories.

**Formatted:** Space After: 9 pt

## 2.52 Guiding Symptoms

— These symptoms are highly characteristic of a particular drug.

**Formatted:** Space After: 9 pt

## 2.53 Hahnemannian Potentization/-Multi Glass Method/-Hahnemannian Dilution

— The potentization technique requiring the formation of each successive potency in a new, fresh, clean glass bottle. A new well-cleaned stoppered glass vial is used for succussion for each potency made by combining 1 part of the original volume and adding 99 parts of diluent to the new vial for each attenuation. It is represented as CH. This method was given by Dr Samuel Hahnemann (1755-to 1843).

**Formatted:** Space After: 9 pt

## 2.54 Homoeopathic Drug

— Any therapeutic agent prepared pharmaceutically from a standardized substance according to the rules, regulations, and methods ~~given~~ outlined in a recognized Homoeopathic Pharmacopoeia. In homoeopathic parlance, a drug, medicine, and remedy are differentiated, as a drug is a substance capable of therapeutic action, a medicine being is a proven drug whose action on various constitutions and in various dosages is well established and can be predicted able prior to its administration infor a disease condition. An indicated homoeopathic medicine, when given to the sick on the basis of individual symptom similarity and can bring about resulting in a cure (in curable diseases), is termed a remedy.

**Formatted:** Space After: 9 pt

These drugs can be classified based on the sources from which they are prepared. Homoeopathic drugs can be:

### 2.54.1 Plant Drugs

— Sourced from the plant kingdom, for example, Aconitum napellus, Belladonna, Lycopodium clavatum, etc.

**Formatted:** Space After: 9 pt

### 2.54.2 Animal Drugs

— Sourced from the animal kingdom, for example, Apis mellifica, Lachesis, Tarantula cubensis, etc.

**Formatted:** Space After: 9 pt

### 2.54.3 Mineral Drugs

— Sourced from the mineral kingdom, i.e., from elements and their compounds, for example, gold, silver, lead, aluminum, copper, sodium chloride, potassium chloride, etc.

**Formatted:** Space After: 9 pt

### 2.54.4 Sarcodes

— Prepared from healthy organisms, healthy animal tissues, glands, or their secretions, for example, Thyroidinum, Adrenaline, Cholesterinum, etc.

**Formatted:** Space After: 9 pt

### 2.54.5 Nosodes

— Prepared from biological materials that are taken from diseased tissues, microbes, and clinical materials (secretions, discharges, etc.), that are subsequently potentized, for example, Tuberculinum, Medorrhinum, Syphilinum, Influenzinum, Morbillinum etc.

**Formatted:** Space After: 9 pt

### 2.54.6 Imponderabilia

— Prepared from dynamic energies, for example, magnets, electricity, radium, x-ray etc. Imponderabilia means not weighable, ~~thati-ethat is,~~ substances that have no perceptible weight; hence, these medicines are prepared from energies from natural or artificial sources. They are immaterial dynamic energies that are utilized as potentized homoeopathic medicines.

**Formatted:** Space After: 9 pt

## IS XXXXX : 2024

~~In homoeopathic parlance, a drug, medicine, and remedy are differentiated as a drug is a substance capable of therapeutic action, medicine being a proven drug whose action on various constitutions and in various dosages is well established and can be predicted prior to its administration in a disease condition. An indicated homoeopathic medicine, when given to the sick on the basis of individual symptom similarity and can bring about a cure (in curable diseases), is termed a remedy.~~

Formatted: Space After: 9 pt

### 2.55 Homoeopathic Medicine

— Any drug which is recorded in homoeopathic ~~proving~~ ~~proving~~ or ~~whose~~ therapeutic efficacy ~~of which~~ has been established through long clinical experience ~~as and~~ recorded in authoritative literature of Homoeopathy, and which is prepared according to the techniques of homoeopathic pharmacy.

**Formatted:** Left, Space After: 9 pt, Line spacing: Multiple 1.08 li, Border: Top: (No border), Bottom: (No border), Left: (No border), Right: (No border), Between : (No border)

### 2.56 Homoeopathic Stocks

— Substance or preparation used as ~~the~~ starting material for dilution or trituration in the preparation of homoeopathic potencies. This includes both raw material and starting material.

Homoeopathic raw material is a substance used to make a starting material, but it may not itself be used directly to produce homoeopathic potency.

Homoeopathic starting material is the ~~material-substance~~ used to directly manufacture the first homoeopathic preparation usually a tincture or the first potency (1X or 1C trituration or attenuation, respectively).

**Formatted:** Space After: 9 pt

### 2.57 Homoeopathy

~~Homoeopathy is a medical system nan art and science of healing based on the natural principle of similia (see 2.96). 'Let Likes Be Cured By Likes', i.e., treatment is undertaken by using substances capable of causing the same symptoms when administered to healthy persons (elicited by drug proving). This therapeutic system method assumes that a deviation from the normal state of health of a person can be restored to normalcy by means of a stimulus, usually applied in the form of drugs, capable of producing a similar deviation in healthy individual health when given in sub-physiological doses. Due to the hypersensitivity and altered receptivity of the body tissues to stimuli, the minute sub-physiological doses of a similar stimulus (homoeopathic drugs) help in restoring the deranged health of sick persons to the previous normal state.~~

~~Homoeopathy is a system of personalised medicine which~~ Homoeopathy is a system of personalized medicine that aims to stimulate the patient's natural healing capacities. It is based on the principle of 'similia similibus curentur' (let like be treated by like), which uses medicines whose effects on healthy individuals match the symptoms of the patients. Homoeopathic medicines are prepared by a process of potentization (serial dilution followed by trituration or succussion) and are administered in minimal doses.

**Formatted:** Space After: 9 pt

### 2.58 Homoeopathic Materia Medica

— A comprehensive collection of information about the therapeutic properties and effects of various substances derived from different sources and used as homoeopathic medicines ~~for therapeutic use~~.

As a branch of Homoeopathy, it involves study of symptomatology of the drugs, their drug picture, which is matched with that of the patient to select the most suited medicine. It also includes study of origin, preparation, doses and administration of drugs.

**Formatted:** Space After: 9 pt

**Formatted:** Border: Top: (No border), Bottom: (No border), Left: (No border), Right: (No border), Between : (No border)

### 2.59 Homoeopathic Physician/ Homoeopath/ Homoeopathic Practitioner

— Practitioners trained and qualified in Homoeopathy as per the applicable laws and regulations, for practicing in the specific country.

In ~~the~~ Indian context, ~~a this refers to person~~ ~~person~~ holding qualifications granted by universities, boards, or medical institutions recognized under the *National Commission for Homoeopathy Act, 2020* and registered with a state board/ state council and/ or national commission for homoeopathy.

**Formatted:** Space After: 9 pt

**Formatted:** Font: Complex Script Font: +Body CS (Mangal), 11 pt, Not Italic

### 2.60 Homoeopathic Pharmacopoeia of India

— Official document prepared, developed, and published by the pharmacopoeia commission for Indian medicine and homoeopathy comprising drug monographs dealing with standards of homoeopathic medicines (raw drugs and finished products), including ~~its~~ ~~their~~ methods of preparation.

**Formatted:** Space After: 9 pt

### 2.61 Hormesis

— A biphasic adaptive response of cells and organisms ~~based on dose response~~ to an environmental agent ~~based on dose response~~ where low doses stimulate or have a beneficial effect in contrast to high doses exhibiting an inhibitory or a toxic effect.

**Formatted:** Space After: 9 pt

**2.62 Idiosyncrasy**

— Peculiar corporeal constitution which, although otherwise healthy, ~~possesses the~~has a disposition to be brought into a more or less morbid state by certain things that seem to produce no impression and no change in many other individuals.

Formatted: Space After: 9 pt

**2.63 Impregnation**

— The process or act of saturation of globules with liquid homoeopathic potencies.

Formatted: Space After: 9 pt

**2.64 Incompatible Medicine/Inimical Medicine**

— A drug ~~known to producing~~produce an undesirable~~ed~~ effect or adverse drug interaction when ~~used administered~~ after another homoeopathic ~~drug~~medicine in an individual patient.

Formatted: Space After: 9 pt

**2.65 Intercurrent Medicine**

— A medicine used during ~~the~~treatment to ~~provide renewed~~restore activity in a stalled case. ~~Application-The application~~of the intercurrent drug ~~paves-facilitates~~the way-for-completing-completion of the action of the ~~initially prescribed~~indicated medicine ~~prescribed-initially~~.

Formatted: Space After: 9 pt

**2.66 Individualization**

— A process of identifying a similimum, wherein ~~the~~ drug pathogenesis is matched with the symptom complex of an individual, rather than ~~being~~ based on the name of the disease, and includes responses on the physical, mental, emotional, and social planes by the individual on various factors during health and disease state.

Formatted: Space After: 9 pt

**2.67 Investigational Homoeopathic Product (IHP)**

— Investigational Homoeopathic Product is any new substance ~~usage~~that is not recorded in any homoeopathic authoritative literature and ~~which~~ has been prepared according to ~~the~~homoeopathic pharmaceutical processes intended for being tested ~~in a study~~as a homoeopathic drug ~~in a study~~. This also includes combinations of existing drugs, ~~where~~ standardization parameters ~~of which are~~different from ~~that-those~~ of ~~its-the~~ individual constituents.

Formatted: Space After: 9 pt

**2.68 Isopathy**

— Treatment of a disease using potentized drugs prepared from the causative agent of the disease itself, including organisms and allergens.

Formatted: Space After: 9 pt

**2.69 Kentian School/Kent's Method**

— The approach of practicing Homoeopathy with analysis of symptoms as mental symptoms, physical generals, and particulars and using the repertory developed by Dr. JT Kent (1849- ~~to~~ 1916) or its later versions and adaptations based on ~~his~~ teachings ~~by Dr. JT Kent~~. This approach is included in classical Homoeopathy.

Formatted: Space After: 9 pt

**2.70 Keynotes/ Keynote Symptoms**

— Leading characteristics of a drug which are relatively specific and unique to that drug. ~~The-This~~ term was coined by Dr HN Guernsey (1817- ~~to~~ 1885).

Formatted: Space After: 9 pt

**2.71 Korsakov Potentization/–Jarricot Potentization/–Single Glass Method/–Single Flask Method/–K Potencies**

— Potentization technique ~~where-in which~~ a ~~well-well~~cleaned stoppered glass vial is used for succussion, ~~involving with~~the removal of 99 parts of the original volume and addition of 99 parts of diluent to the remaining volume at each level of potentization. ~~Potentization-for-For~~ further potencies ~~potentization continues in the same~~ ~~is done in a similar manner with the use of a single vial for the process~~ instead of ~~using~~ individual vials for each potency, as is done in the Hahnemannian method.

Formatted: Space After: 9 pt

It is represented as “CK” or “C” instead of “CH” to distinguish it from the Hahnemannian method of potentization. This method was given by Count Iseman von Korsakoff (1788- ~~to~~ 1853).

**2.72 Local Symptoms/–Locals/–Particular Symptoms/–Particulars/–Physical Symptoms/ Somatic Symptoms**

— —

Formatted: Space After: 9 pt

Changes and ailments that appear or are felt on the external parts of the body, ~~reflecting~~ ~~expressing~~ the local ~~manifestation-expression~~ of the illness in relation to a particular organ, ~~or~~ organ system, ~~or~~ regional anatomy.

### 2.73 Maceration

— The specific process in which pulp or finely divided drug is soaked for a pre-specified number of days in a solvent of alcohol and water in percentage as defined in the Pharmacopoeia and is agitated occasionally until the solvent penetrates the cellular structure of the dissolved substance to extract the active principles of a drug. Maceration is done with agitation twice a day using a clean stirrer.

Formatted: Space After: 9 pt

### 2.74 Mental Symptoms/~~Mentals~~/~~Mind~~ Symptoms

— Characteristics of the mental and emotional state of the patient, irrespective of whether the presenting features of the illness involve the mind. ~~Includes-This includes~~ symptoms of will, understanding, memory and emotions. These can be interpreted as symptoms when there are characteristic changes in the thinking, action, and behavior of a person noted during an illness.

Formatted: Space After: 9 pt

### 2.75 Miasms

— In the context of homoeopathic philosophy, miasms are the root cause of chronic diseases. Dr Samuel Hahnemann (1755- ~~to~~ 1843) proposed this theory in his text 'Chronic Diseases' in 1828 and in the 4<sup>th</sup> edition of the organon of medicine in 1829.

Formatted: Space After: 9 pt

Case analysis based on the study of the miasmatic burden of the patient is called miasmatic analysis (or miasmatic approach or miasmatic prescribing).

### 2.76 Modalities (~~Singular~~: Modality)

— Factors that modify the behavior, level, ~~degree of~~ intensity, or severity of a clinical state (symptom, sign, pathology, or disorder). These can be related to the time of the day or night, season, environmental factors, weather, movement or position of the body, situations, food, drinks or intake of any other substance, and emotional status or physical conditions of an individual, etc.

Formatted: Space After: 9 pt

Factors that cause aggravation or amelioration in an individual are aggravation modalities or amelioration modalities respectively.

### 2.77 Mother Tincture

— The first liquid hydroalcoholic preparation made from raw drug material as per the homoeopathic pharmaceutical techniques. ~~It is prepared as per the provision~~ given in recognized Homoeopathic Pharmacopoeia. It can be used independently or can be used for preparation of further potencies and preparation of other forms of usage.

Formatted: Space After: 9 pt

### 2.78 M Potencies

— Part of the centesimal scale of potentization where the ~~roman~~Roman numeral "M" is used to denote 1000, such as 1M, 10M ~~and~~ ~~CM~~ ~~CM~~, etc.

Formatted: Space After: 9 pt

### 2.79 Observational Study

— In homoeopathic treatment studies, observational study designs collect ~~findings-data~~ on a therapeutic or prophylactic ~~treatmentstreatment~~ under routine clinical conditions. ~~It-This is a~~ clinical research ~~design wherein~~ ~~investigatorsinvolves~~ ~~assessing-assess~~ health outcomes in groups of participants according to a research plan or protocol, where participants receive interventions or procedures as part of their routine medical care. The participants are not assigned to novel interventions by the investigator as in a clinical trial. These studies may be conducted with or without a control group. It is a clinical research method wherein the investigators/-researchers just observe the clinical phenomenon to find a relation between drug administration (exposure) and a disease/symptom (outcome).

Formatted: Space After: 9 pt

### 2.80 Organon of Medicine

— Authoritative text written by Dr Samuel Hahnemann (1755- ~~to~~ 1843), which incorporates the philosophy, rules, and guiding principles for the practice of homoeopathy in the form of aphorisms. Five editions of the organon of

Formatted: Space After: 9 pt

medicine were published during his lifetime, and the sixth was published posthumously. The fifth and the sixth editions are the most frequently referred editions.

~~Also it is also~~: a branch of homoeopathy that involves the study of philosophy, principles, and practice of Homoeopathy.

### 2.81 Organotherapy

== Organotherapy is a method of ~~reaching-identifying~~ the similimum for a patient by focusing on the diseased, imbalanced, or dysfunctional organ instead of the organism as a whole. This ~~method-helps~~ approach aims to remove certain blocks acting as obstacles to cure. Small and frequently repeated material doses are usually used in this mode of treatment.

Formatted: Space After: 9 pt

### 2.82 Percolation

== Percolation is a method of extraction of phytochemicals and other constituents from dried drugs of plant/ animal origin using alcoholic (ethyl-alcohol) or hydro-alcoholic solvent using a percolator. It is a specific process adopted for the extraction of dried, non-gummy, and non-mucilaginous drugs of vegetable and other organic (animal) substances using an apparatus called percolator, made up of glass, stainless steel, or porcelain. Drug substances are reduced to powder form according to the grades of fineness as specified in the respective drug monographs of homoeopathic pharmacopoeia. The usual time taken for collecting extract/tincture from the percolator is 24 h to 30 h.

Formatted: Space After: 9 pt

### 2.83 Polychrests/Polychrest Medicines ==

A ~~drug~~ that ~~is-are~~ sufficiently proven and used in homoeopathic clinical practice and can be used for the treatment of a number of diseases because of their wide therapeutic action.

Formatted: Left, Space After: 9 pt, Line spacing: Multiple 1.08 li

Formatted: Justified

### 2.84 Posology

== The science of doses, which includes the particular preparation of medicine used, its quantity and form of preparation, and its route of administration.

Formatted: Space After: 9 pt

**2.85 Potency/Succused Dilutions/Potencies/ Ultra High Dilutions.** == The potency of homoeopathic medicine represents the number of times it has undergone the potentization ~~The~~ on a prefixed scale.

### 2.86 Potentization/Potentisation ==

== Potentization is a homoeopathic pharmaceutical process of serial reduction or dilution of the crude drug substance in a pre-fixed ratio along on decimal, centesimal, or millesimal scale with mechanical processing (either grinding- called trituration or ~~shaking the vial with downward strokes called~~ succussion) to develop homoeopathic preparations of different strengths/preparation, called potency/potencies. The process was introduced in the organon of medicine in the 5<sup>th</sup> and 6th edition ~~(1833)~~.

Formatted: Space After: 9 pt

Formatted: Font: Font color: Text 1, Complex Script  
Font: +Body CS (Mangal), 11 pt, Not Bold

Formatted: Font: Font color: Text 1, Complex Script  
Font: +Body CS (Mangal), 11 pt, Not Bold

Formatted: Space After: 9 pt

### 2.87 Potentization in Centesimal Scale

== Potentization, where each stage of dilution is at a scale of 1 in 100 (1:99). It is based on the principle that the first potency contains one-hundredth part of the original drug, and each succeeding potency contains one-hundredth part of the potency preceding it. It is denoted by C, CH, or CK depending on the method of preparation after dilution number or simply by dilution number. C or CH implies Hahnemannian potentization, and CK implies Korsakovian potentization.

Formatted: Space After: 9 pt

### 2.88 Potentization in Decimal Scale

== Potentization, where each stage of dilution is at a scale of 1 in 10 (1:9). It is based on the principle that the first potency contains one-tenth part of the original drug, and each succeeding potency contains one-tenth part of the potency preceding it. It is denoted by D or X after the dilution number.

Formatted: Space After: 9 pt

### 2.89 Potentization in Fifty Millesimal Scale/ 50 Millesimal Dynamizations

== Potentization, where each stage of dilution is 1 in 50,000. It is based on the principle that the first potency contains one-fifty-thousandth part of the original drug, and each succeeding potency contains one-fifty-thousandth part of the potency preceding it. It is denoted by O/1, O/2, and so on to denote the extent of dilution of medicines. Such prepared potencies are also called LM Potencies/-Q Potencies/-Quinquagen Millesimal potencies.

Formatted: Space After: 9 pt

### 2.90 Pragmatic Trials

== Pragmatic trials are clinical research studies conducted in real-life routine practice conditions designed to evaluate the effectiveness of interventions ~~under-in~~ flexible, practical conditions.

Formatted: Space After: 9 pt

### 2.91 Remedies that follow well

== Medicines that are helpful on follow-up prescriptions from the previous one.

Formatted: Space After: 9 pt

### 2.92 Repertorization

== The technique of shortlisting a group of homoeopathic medicines using a medicine index (called repertory) ~~to~~ shortlist a group of homoeopathic medicines whose symptomatology given in the Materia Medica corresponds most closely to the clinical picture of the patient and from amongst which the similimum may be ~~chosen~~ selected.

Formatted: Space After: 9 pt

### 2.93 Repertory

== Systematic cross-reference index of symptoms and disorders (called rubrics) ~~to which~~ with a list of the medicines (usually graded) which are known to have produced ~~that the~~ symptom or disorder in homoeopathic pathogenetic trials, or ~~to~~ have remedied it in clinical practice. ~~It is attached, usually along with their gradations. It is a~~ This reference work is extracted from the materia medica, where ~~the~~ various symptoms are listed with detailed, staggered information on site, time, concomitant, circumstances, and conditions.

Formatted: Space After: 9 pt

IS XXXXX : 2024

|

**2.94 Saccharum Lactis/ Sugar of Milk/ Lactose** — It is a disaccharide sugar synthesized by galactose and glucose subunits. It is prepared

~~Prepared~~ from milk and frequently used as a solid vehicle in homoeopathic pharmacies for the preparation of tablets and globules. It is also used as a vehicle for trituration. ~~It is a disaccharide sugar synthesized by galactose and glucose subunits.~~ IUPAC: 4-O-β-D-Galactopyranosyl-D-glucose.

Formatted: Justified

**2.95 Second Prescription/ Follow-up Prescription**

— The second prescription is the medicine prescribed after the first medicine that has acted. ~~It may be~~ either repetition, antidote, or complementary to the previous medicine or change of plan of treatment.

Formatted: Space After: 9 pt

**2.96 Similia Principle/ Law of Similars/ Principle of Similarity**

— The principle based on the Latin maxim "similia similibus curentur" (let like be treated by like) on which Homoeopathy is based. The principle wherein a substance ~~is used~~ can therapeutically ~~to~~ treat disorders with symptoms similar to ~~that those~~ which it ~~will can~~ induce in a healthy individual.

Formatted: Space After: 9 pt

**2.97 Similimum**

— The most similar remedy that matches the totality of the symptoms of a given case and that cures/ relieves the patient.

Formatted: Space After: 9 pt

**2.98 Succussion**

— The pharmaceutical process of potentization by involving forcefully striking of a homoeopathic drug mixed ~~and shaken~~ with a diluent or liquid vehicle like dispensing alcohol or purified water in a glass bottle and shaken against a firm surface in a uniform definite manner as prescribed by the homoeopathic pharmacopoeias to deliver the mechanical energy to the preparation.

Formatted: Space After: 9 pt

**2.99 Sucrose/ Saccharose** — It is a disaccharide composed of glucose and fructose subunits. It is prepared

— ~~Prepared~~ from cane sugar or beet sugar, used in Homoeopathy for the preparation of globules, pellets, and syrups and rarely as a vehicle for trituration. ~~It is a disaccharide composed of glucose and fructose subunits.~~ It is produced naturally in plants and is the main constituent of white sugar. IUPAC β-D-Fructofuranosyl α-D-glucopyranoside.

Formatted: Space After: 9 pt

**2.100 Susceptibility**

— Susceptibility is a sum total of such factors, which are responsible for the individual's reaction to disease stimuli and, therefore, govern the identification of the most similar medicine, appropriate potency, and dosage affecting the outcome of treatment. It is the ability and capacity of an individual to deal effectively in health and disease conditions.

Formatted: Space After: 9 pt

**2.101 Tautopathy**

— The use of a potentized ~~form preparation~~ of a conventional drug or drugs used in other systems prepared, as per the recognized homoeopathic pharmacopeia and primarily used to antidote their side effects or over effects.

Formatted: Space After: 9 pt

**2.102 Trituration**

— A pharmaceutical process of potentization involving grinding and mixing de-concentration of a raw drug material with ~~another~~ inert solid material (usually lactose) by grinding and mixing the two in a prefixed concentration, as defined in the homoeopathic pharmacopoeias, ~~with the aim of reducing~~ This process aims to reduce the insoluble drug substance to its finest possible state and imprinting the pharmacological properties of the original drug substance onto the molecules of the diluent. The potency thus prepared is called triturate.

Formatted: Space After: 9 pt

**2.103 Totality of Symptoms/ Symptom Complex/ Symptom Totality**

— It is the outwardly reflected picture of the internal essence of the disease. ~~It is, representing~~ the sum total of all the characteristic symptoms gathered during the process of case-taking and examination of the patient. It is the ~~process of logically combining~~ combination of the symptoms and signs into a harmonious and consistent whole, having form, coherency, and individuality, not the mere numerical totality of symptoms. ~~It is a~~ This syndrome forms a base on which an indicative curative remedy can be selected.

Formatted: Space After: 9 pt

**2.104 Vehicle**

— In the context of Homoeopathy, a vehicle is an agent, ~~that is~~ therapeutically inert, ~~and~~ used as a solvent or carrier in the preparation, preservation, or administration of homoeopathic medicine. They are non-reactive with the drug substance and ~~aet-serve~~ as a ~~media-medium~~ for the extraction of the properties of the drug, its preservation, and the conveyance of its therapeutic properties to the intended site. There are three types of vehicles: solid, liquid, and semisolid, used in Homoeopathy for trituration, succussion, external applications, and for dispensing medicine.

Formatted: Space After: 9 pt

**2.105 Vital Force/-Dynamis/-Entelechy/-Vital Energy/-Vis Mediatrix Naturae/-Vitalism/-Life Force/-Vital Principle/-Life Principle**

— It is the dynamic force that animates living organisms and is assumed to account for organic life and its phenomena. The term was defined by Dr Samuel Hahnemann in the organon of medicine, in Aphorism § 9 to § 18, implying the entity that provides sensation and function to a living organism as compared to a dead and harmonious flow of which is health, whereas disharmony causes disease.
