GROUPING GUIDELINES

Cashew Kernels are categorized into the following based on its colour, Size and Shape. Based on Colour of the kernels, Cashew is divided into three categories:

Basis of Categorization	Varieties

Shape	Whole, Pieces (Pieces are further sub-divided into Splits, Butts, Large Pieces, Small Pieces, Baby bits etc.) Whole is considered Superior to Pieces
Grade	As mentioned within the respective tables at Annex-A of IS 7750

Based on the above consideration, the following sampling guidelines are shall be followed:

- 2) If White variety of kernel is tested, then Scorched and Dessert varieties may be covered in the scope of licence. Similarly, if Scorched variety is tested then Dessert variety may also be covered in the scope of licence.
- 3) For covering different shapes, if whole kernels are tested then pieces within the same colour category may be covered in the scope of the licence.

Example :

- a) If any one grade of white whole kernels (Table A-1) is tested and found conforming, then all the varieties may be covered in the scope of the licence.
- b) If any one grade of scorched whole kernels (Table A-2) is tested and found conforming, then all other varieties under Scorched and Dessert category for all grades (Tables A-2, A-3, A-5 and A-6) are to be covered in the scope of licence.
