IEC 60904-8-1:2017
ETD 28 Doc. (12562)

Photovoltaic Devices - Part 8: Measurement of spectral responsivity of Photovoltaic PV Devices - Sec 1 : Multi-Junction PV Devices

The standard gives guidance for the measurement of the spectral responsivity of multi-junction photovoltaic devices. It is principally intended for non-concentrating devices, but parts may be applicable also to concentrating multi-junction PV devices. The SR is required for analysis of measured current-voltage characteristics of multi-junction PV devices as described in IEC 60904-1-1.
