Indian Standard

SPECIFICATION FOR SHARE FOR TRACTOR-OPERATED MOULDBOARD PLOUGHS

1. SCOPE

1.1 This standard specifies material, dimensional and other requirements for shares for tractor-operated mouldboard ploughs.

FOREWORD

0.1 This Indian Standard was adopted by the Indian Standards Institution on 10 October 1983, after the draft finalized by the Soil Working Equipment Sectional Committee had been approved by the Agricultural and Food Products Division Council.

0.2 The share is an important soil engaging component of mouldboard plough bottom. Being soil engaging part, it wears out earlier than other components and has to be replaced frequently. Therefore, to ensure interchangeability, necessary dimensions of the shares have been specified in this standard.

0.3 This standard is related to the manufacturing and trade practices prevailing in the country.

0.4 For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test, shall be rounded off in accordance with IS : 2-1960*. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard

*Rules for rounding off numerical values (*revised*).
