Indian Standard

SPECIFICATION FOR WHEAT PORRIDGE

1. SCOPE

1.1 This standard prescribes the requirements and the methods of sampling and test for wheat porridge.

FOREWORD

0.1 This Indian Standard was adopted by the Indian Standards Institution on 31 January 1984, after the draft finalized by the Foodgrains and Foodgrain Industries Sectional Committee had been approved by the Agricultural and Food Products Division Council.

0.2 Wheat porridge is a common breakfast food in India. It is prepared by cooking with milk or water and adding sugar or milk to taste. It is also cooked with vegetables and consumed as savoury dish.

0.3 Wheat porridge is produced by gristing wheat in such a manner that a granular product, containing as little flour as possible is obtained. Most of this flour is removed by sifting.

0.4 In the formulation of this standard due consideration has been given to the *Prevention of Food Adulteration Act, 1954*, and Rules framed thereunder. Due consideration has also been given to the *Standards of Weights and Measures (Packaged Commodities) Rules, 1977*. However, this standard is subject to restriction imposed under these rules, wherever applicable.

0.5 For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS : 2-1960*. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

*Rules for rounding off numerical values (*revised*).
