Indian Standard

**SPECIFICATION FOR
AIR-SCREEN SEED CLEANER**

1. SCOPE

1.1 This standard specifies material, constructional, performance and other requirements of air-screen seed cleaners.

FOREWORD

0.1 This Indian Standard was adopted by the Indian Standards Institution on 28 September 1984, after the draft finalized by the Agricultural Produce Processing Equipment Sectional Committee had been approved by the Agricultural and Food Products Division Council.

0.2 The freshly harvested seeds often contain inert matter like chaff, stems, stones, deteriorated and damaged seeds, weeds and other crop seeds. Air-screen seed cleaners are used to remove these from the basic seed. This standard provides a guide to the manufacturers and users in production and purchase of quality cleaner.
