Indian Standard

**METHOD OF TEST FOR
DETERMINATION OF THERMAL ENDURANCE
OF INSULATING VARNISHES**

PART 3 BOND STRENGTH BY HELICAL COIL METHOD

1. SCOPE

1.1 This standard (Part 3) covers a method for determining the thermal endurance of insulating varnishes by evaluating the bond strength of a thin film of insulating varnish on a helical coil by measuring the changes in the strength of dried film of varnish as affected by ageing at elevated temperature.
