Indian Standard
GLOSSARY OF TERMS
RELATING TO FARM DRAINAGE

0. FOREWORD

0.1 This Indian Standard was adopted by the Indian Standards Institution on 31 January 1986, after the draft finalized by the Farm Drainage Sectional Committee had been approved by the Agricultural and Food Products Division Council.

0.2 With the increasing emphasis on farm drainage, a need was felt for a comprehensive glossary which would provide authentic definition of terms used in the field. It is hoped that this standard would bring uniformity in the interpretation of various terms used.

0.3 An Indian Standard glossary of terms relating to river valley projects (IS : 4410) has been published in several parts which covers the definitions of drainage terms in general. However, this standard has been prepared to define the terms specific to farm drainage only.

1. SCOPE

1.1 This standard covers the definitions of various terms used in relation to farm drainage.
