Indian Standard
**METHODS OF TEST FOR
DETERMINATION OF FLAMMABILITY OF
SOLID ELECTRICAL INSULATING MATERIALS
WHEN EXPOSED TO AN IGNITING SOURCE**

PART 1 HORIZONTAL SPECIMEN METHOD

1. SCOPE

1.1 This standard (Part 1) covers the horizontal specimen method in which the burning rate is evaluated on the basis of extent of burning and/or the velocity of the flame propagation.

The tests are carried out on horizontal position of test specimens of fixed dimensions and under definite assessment criteria with specified Igniting sources.
