## *Indian Standard*

### SPECIFICATION FOR DOG FEEDS

#### 1. SCOPE

**1.1** This standard prescribes the requirements, and methods of sampling and test for dog feeds of all categories.

#### FOREWORD

**0.1** This Indian Standard was adopted by the Indian Standards Institution on 28 November 1936. after the draft finalized by the Animal Feeds Sectional Committee had been approved by the Agricultural and Food Products Division Council.

**0.2** This is one among the series of Indian Standards being formulated to ensure availability of compounded feeds of suitable quality for different animals. It is expected that these standards would be of assistance to the rapidly developing animal feed industry.

**0.3** The fungus *Aspergillus flavus* generally associated with groundnuts and oilcakes produces aflatoxin, the presence of which in feeds do affects the health and efficiency of these animals. The committee responsible for this standard is seized of the aflatoxin problem. The safe limit and reliable method for its estimation will be included in the standard no sooner these are finalized.

**0.4** For the purpose of deciding, whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS : 2-1960\*. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

---

\*Rules for rounding off numerical values ( *revised* ).
