Indian Standard

JEWELLERY - GOLD ALLOY COATINGS

1 Scope

This International Standard specifies the coating thickness requirements and the gold fineness of the coating. It also defines current terms concerning gold alloy coatings.

It is not applicable to watch bracelets if they are permanently attached to the case.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this International Standard. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this International Standard are encouraged to investigate the possibility of applying the most recent editions of the standards indicated below. Members of IEC and ISO maintain registers 'of currently valid International Standards.

ISO 3160-2:1982, *Watch cases and accessories - Gold alloy coverings - Part 2: Determination of fineness, thickness and corrosion resistance.*

ISO 3497: 1990, *Metallic coatings - Measurement of coating thickness - X-ray spectrometric methods.*

ISO 3543: 1981, *Metallic and non-metallic coatings Measurement of thickness - Beta backscatter method.*

ISO 9220:1988, *Metallic coatings - Measurement of coating thickness - Scanning electron microscope method.*
