

Indian Standard REFRACTORY MORTARS

PART 5 DETERMINATION OF GRAIN SIZE DISTRIBUTION (SIEVE ANALYSIS)

1 Scope

This part of ISO 13765 describes a method for determining the grain size distribution of refractory mortars by sieve analysis.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 565, Test sieves— Metal wire cloth, perforated metal plate and electroformed sheet— Nominal sizes of openings

ISO 8656-1, Refractory products— Sampling of raw materials and unshaped products— Part 1: Sampling scheme

ISO 13765-6, Refractory mortars— Part 6: Determination of moisture content of ready-mixed mortars
