Hard Coal and Coke — Mechanical Sampling

Part 5 Coke — Sampling from Moving Streams

1 Scope

This part of ISO 13909 specifies procedures and requirements for the design and establishment of sampling schemes for the mechanical sampling of coke from moving streams and the methods of sampling used.

The diversity of types of equipment for sampling and the conditions under which mechanical sampling is performed make it inappropriate to specify standard designs for samplers which will be applicable to all situations.

2 Normative references

The following normative documents contain provisions which, through reference in this text, constitute provisions of this part of ISO 13909. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. However, parties to agreements based on this part of ISO 13909 are encouraged to investigate the possibility of applying the most recent editions of the normative documents indicated below. For undated references, the latest edition of the normative document referred to applies. Members of ISO and IEC maintain registers of currently valid International Standards.

ISO 13909-1:2001, Hard coal and coke—Mechanical sampling—Part 1: General introduction.

ISO 13909-6:2001, Hard coal and coke—Mechanical sampling—Part 6: Coke—Preparation of test samples.

ISO 13909-7:2001, Hard coal and coke—Mechanical sampling—Part 7: Methods for determining the precision of sampling, sample preparation and testing.

ISO 13909-8:2001, Hard coal and coke—Mechanical sampling—Part 8: Methods of testing for bias.
