

SYNOPSIS

FAD 4 (2811) F/ISO 9512 : 2002 Cigarettes — Determination of ventilation — Definitions and measurement principles

205

- a) Scope:** This International Standard specifies a method for the determination of ventilation which is applicable to cigarettes.
- b) Salient features of content:** This standard prescribes a method where air is drawn, at a constant flow rate, in the standard smoking direction through an unlit cigarette. The individual components of ventilation are measured separately. The degrees of ventilation are obtained by calculation.
- c) Types/grades/classes, if any covered in the standard:** Nil
- d) Disclaimer (to be automatically provided by the programme/ software)**
