

SYNOPSIS

IS : 2020

IS Title: ELECTRIC TRACTION LIFTS --- REPLACEMENT OF EXISTING PASSENGER AND GOODS PASSENGER LIFTS IN EXISTING BUILDING

SCOPE

This Indian Standard specifies the safety rules related to replacement of existing lifts permanently installed in existing buildings where in some circumstances due to limitations enforced by building constraints, some requirements of IS 14665 cannot be met.

This Indian Standard addresses a number of these constraints and gives requirements for alternative solutions. It shall be read and applied in conjunction with the Indian Standard IS 14665 and its amendments.

This Indian Standard covers the replacement of an existing lift by a new one in existing lift well and machinery spaces.

This Indian Standard does not cover:

- a) Replacement or modifications of some parts to a lift already installed;
- b) Applications outside of the scope of IS 14665.
