

FORMAT FOR SYNOPSIS OF INDIAN STANDARDS

Number and Title of the Indian Standard:	IS/ISO 17316 : 2015 Information and Documentation- International Standard Link Identifier (ISLI) MSD 5 (14525)
a) Scope	This Standard specifies an identifier of links between entities (or their names) in the field of information and documentation. These entities can be documents, media resources, people, or more abstract items such as times or places.
b) Salient features of content:	<p>The ISLI system identifies links between entities that are related to each other so that, for instance, they can be rendered jointly. It does this by registering each link identifier with information (metadata) that specifies the link. The ISLI does not change the content, ownership, right of access, or existing identification of these entities.</p> <p>This Standard does not specify the technology used to represent the identifier or realize the link. It enables applications to be built which use the interoperable ISLI system for the identification of links.</p>
c) Type/grades/classes, if any covered in the standard:	Nil
d) disclaimer (to be automatically provided by the program/software)
