

C-336

SYNOPSIS

Document Number and Title: CHD 20 (15009) Methods of Sampling and Test for Paints, Varnishes and Related Products Part 7 Environmental Tests on Paint Films Section 3 Determination of the effect of heat (Fourth Revision)

This standard was originally published in 1950 and subsequently revised in 1961, 1964 and 1990.

The fourth revision of this standard has been undertaken to align it with the latest version of ISO 3248 : 2016.

The major changes in this revision are as follows:

- a) cooling down of the test panels after the test has been changed from standard temperature to ambient temperature;
- b) a principle clause has been added;
- c) the normative references have been updated; and
- d) the supplementary test conditions previously in Annex A have been integrated in the test report.

In this adopted standard, reference appears to certain International Standards where the standard atmospheric conditions to be observed are stipulated which are not applicable to tropical/subtropical countries. The applicable standard atmospheric conditions for Indian conditions are $27 \pm 2^{\circ}\text{C}$ and 65 ± 5 percent, relative humidity and shall be observed while using this standard.
