Indian Standard

ELECTROTECHNICAL VOCABULARY

PART 10 POWER SYSTEM PROTECTION

NATIONAL FOREWORD

This Indian Standard (Part 10) (Second Revision) which is identical with IEC 60050-(448) : 1995 'international Electrotechnical Vocabulary — Chapter 448: Power system protection' issued by the International Electrotechnical Commission (IEC) was adopted by the Bureau of Indian Standards on the recommendation of the Basic Electrotechnical Standards Sectional Committee and approval of the Electrotechnical Division Council.

This standard was first published in 1968. The first revision was published in 1993. The second revision has been undertaken in order to bring it in line with the latest IEC publication IEC 60050-(448) :1995. The text of IEC Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test or analysis, shall be rounded off in accordance with IS 2:1960 'Rules for rounding off numerical values (revised)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.
