Indian Standard

SPECIFICATION FOR MUSTARD, WHOLE AND GROUND

FOREWORD

0.1 This Indian Standard (First Revision) was adopted by the Indian Standards Institution on 15 February 1983, after the draft finalized by the Spices and Condiments Sectional Committee, had been approved by the Agricultural and Food Products Division Council.

0.2 Mustard is one of the important and commonly used material for spices in the Indian dietary as well as for the production of edible oil. It is marketed as whole dry seeds. It is also used in the production of mustard powder which is obtained by grinding mustard seeds.

0.3 Originally two separate Indian Standards (IS : 2323 and IS : 2799) were issued on Specification for mustard whole and mustard powder. In view of the increasing use of material in spice trade, the Committee felt that the two standards should be amalgamated in one Indian standard to facilitate its maximum utility. Hence IS : 2323 has been revised and IS : 2799 is being withdrawn. The limits specified in Table 2 are intended to be reviewed with the experience gained.

1. SCOPE

1.1 This standard prescribes the requirements for mustard, whole and ground for use as spices and condiments.

*Rules for rounding off numerical values (*revised*).
