Indian Standard

**SPECIFICATION FOR
CABLES FOR MOTOR VEHICLES**

SECTION 1 GENERAL

1. SCOPE

1.1 This standard covers the requirements and tests for the following types of cables for general use in motor vehicles:

a) Ignition cables of following types:

- 1) Elastomer insulated, and
- 2) PVC insulated.

b) General wiring cables of the following types where the voltage does not exceed 100 V:

- 1) Single core PVC insulated; and
- 2) Circular twin, three and four core PVC insulated and PVC sheathed.

c) Round and flat tinned copper braids without further covering for earthing.
