Indian Standard

METHODS OF TEST FOR GYPSUM PLASTER, CONCRETE AND PRODUCTS

PART II GYPSUM PRODUCTS

(First Revision)

Section 1 Measurement of Dimensions

1. SCOPE

1.1 This standard (Part II/Section 1) covers the method of measuring the dimensions of gypsum products.

Section 2 Determination of Mass

1. SCOPE

1.1 This standard (Part II/Section 2) covers the method of determining the mass of gypsum products.

Section 3 Determination of Mass and Thickness of Paper Surfacing

1. SCOPE

1.1 This standard (Part II/Section 3) covers the method of determining the mass and thickness of paper surfacing of gypsum boards.

Section 4 Transverse Strength

1. SCOPE

1.1 This standard (Part II/Section 4) covers the method of carrying out transverse strength on gypsum products

Section 5 Compressive Strength

1. SCOPE

1.1 This standard (Part II/Section 5) covers the method of determining compressive strength of gypsum partition Blocks.

Section 6 Water Absorption

1. SCOPE

1.1 This standard (Part II/Section 6) covers the method of carrying out water absorption test on gypsum plaster boards
