Indian Standard SPECIFICATION FOR CANNED MANGOES

FOREWORD

- **0.1** This Indian Standard was adopted by the Indian Standards Institution on 19 September 1964, after the draft finalized by the Fruits and Vegetables Sectional Committee had been approved by the Agricultural and Food Products Division Council.
- **0.2** Canned mangoes occupy a very prominent place among the processed fruits which are exported from India. There is ample scope for the development of external as well as the internal trade. It is, however, necessary to ensure the quality of the products, if the demand is to be maintained and further developed. In order to ensure maintenance of proper quality, it is necessary to have strict quality control based on specifications. It was, therefore, found necessary to formulate an Indian Standard Specification for this product.
- **0.3** In the preparation of this standard, due consideration has been given to the provisions of the Prevention of Food Adulteration Act, 1954; the Prevention of Food Adulteration Rules, 1955 and the Fruit Products Order, 1955. However, this standard is subject to the restrictions imposed under these, wherever applicable.
- **0.4** In this standard the trade designations and the trade sizes, along with the converted metric values, of the containers as at present being used within the country have been specified. These dimensions would be revised as and when an Indian Standard for open top sanitary cans is published.
- **0.5** For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS: 2-1960*. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

1. SCOPE

1.1 This standard prescribes the requirements for canned mangoes, *Mangifera indica* L., in syrup.

^{*}Rules for rounding off numerical values (revised).
