

Indian Standard

CONCRETE PIPES - METHODS OF TEST

(Second Revision)

1 SCOPE

This standard covers methods for carrying out the following tests on concrete pipes, both reinforced concrete and prestressed concrete and of pressure and non-pressure types to evaluate the properties stipulated in the relevant Indian Standards:

- a) Three-edge bearing test,
- b) Absorption test,
- c) Hydrostatic test,
- d) Permeability test, and
- e) Straightness test,
